DEPOSITORY LIBRARY MATERIAL

Note

This and other government publications may be purchased from local authorized agents and other community bookstores or by mail order.

Mail orders should be sent to Publications Distribution, Statistics Canada, Ottawa, K1A 0T6, or to Publishing Centre, Supply and Services Canada, Ottawa, K1A 0S9.

Inquiries about this publication should be addressed to:

Provincial Section,
Public Finance Division,

Statistics Canada, Ottawa, K1A 0T6 (telephone: 995-8201) or to a local Advisory Services office:

Symbols

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

Because of rounding, totals and sub-totals for statistical tables may differ slightly from the sum of their component parts.

The reader is cautioned that data for fiscal years prior to the 1970 issue of this publication are not comparable because of changes in coverage. To assist users, the Public Finance Division has undertaken to provide the principal items of information required to adjust data for the years 1965 to 1969 to the new basis. This information may be obtained upon request from the Public Finance Division, Statistics Canada, Ottawa.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTA

À cause de l'arrondissement des chiffres, les totaux et sous-totaux ne correspondent pas toujours à l'addition de leurs composants.

Le lecteur est averti que les données de cette publication pour les années fiscales précédentes à 1970 ne sont pas directement comparable par suite des changements apportés à la couverture statistique. Pour venir en aide aux utilisateurs, la Division des finances publiques a entrepris de fournir les principales informations nécessaires à l'ajustement sur la nouvelle base des données pour les années 1965 à 1969. Ces informations sont disponibles sur demande auprès de la Division des finances publiques, Statistique Canada, Ottawa.

Introduction

This publication presents the revenues and expenditures of the governments of each of the Canadian provinces and territories in the form of government financial management statistics. The primary objective of the publication is to meet the needs of users of financial information pertaining to the activities of these governments by converting the idiosyncratic data produced by each government into standardized statistics which are compatible as between these governments (and also with those of other levels of government produced by the Public Finance Division of Statistics Canada) and are consistent from one reference period to another.

The Financial Management Statistics System

The concepts and classifications underlying this statistical system are described in detail in the publication “The Canadian System of Government Financial Management Statistics” (Catalogue (68-506). Canadian governments at all three levels — federal, provincial and local — display much the same organizational structure — a legislature to which is subordinated a central core of departments to which, in turn, are attached numbers of agencies with varying degrees of autonomy. However, this general similarity of structure disappears when a detailed examination is made. Similarly-named entities perform quite different roles in different governments; services provided by a department in one government are provided by an agency in a second and are not provided at all in a third; and, while most agencies provide “government-type” services, others provide goods or services which in other jurisdiction could be, and often are, provided by non government commercial entities. Furthermore, since most government finance reports are designed to show administrative accountability and hence are closely related to organizational structures, the raw data contained in these reports are practically useless for any study which seeks to relate the financial activities of one government to those of another.

The Canadian System of Government Financial Management Statistics seeks to overcome the lack of homogeneity in raw government financial information at the provincial/territorial level in the following ways:

Introduction

Cette publication présente les recettes et dépenses publiques de chaque province ou territoire du Canada sous forme de statistiques de la gestion financière des gouvernements. Elle vise d'abord à répondre aux besoins des utilisateurs en renseignements financiers relatifs aux activités de ces gouvernements en transformant les données particulières produites par chacun en statistiques normalisées pour les divers gouvernements (compatibles avec celles produites par la Division des finances publiques de Statistique Canada sur d'autres niveaux de gouvernement) et comparables d'une période de référence à une autre.

Système statistique de la gestion financière

Les concepts et classifications qui sous-tendent ce système statistique sont décrits en détail dans la publication “Le système canadien des statistiques de la gestion financière” (no 68-506 au catalogue). Les trois paliers de gouvernement au Canada — fédéral, provincial et local — se ressemblent beaucoup; ils comprennent une assemblée législative dont relève un groupe central de ministères ou services auxquels se rattachent une grande quantité d'organismes jouissant de divers degrés d'autonomie. Cependant, cette similitude de structure ne soutient pas un examen détaillé. Des ministères ou services ayant des noms semblables diffèrent sensiblement dans le cas de certains gouvernements; certains services fournis par un ministère dans une province le sont par un organisme dans une autre et ne le sont pas dans une troisième; de plus, bien que la plupart des organismes assurent des services “publics”, d'autres organismes fournissent des biens ou services qui, ailleurs, pourraient être fournis, et le sont souvent, par l'entreprise privée. Comme la plupart des rapports financiers des gouvernements font état de la responsabilité administrative et, par conséquent, suivent de près la structure de l'organisation, les données qu'ils renferment sont presque inutiles pour toute étude visant à comparer les activités financières de divers gouvernements.

Le système canadien des statistiques de la gestion financière cherche à corriger le manque d'homogénéité entre les renseignements financiers fournis par les diverses provinces ou territoires par les moyens suivants:

The government universe is divided in two parts — general government and government enterprises. The general government consists of:

Departments of government;

special funds (see “Appendix” for the list of special funds included in this report):

administrative and regulatory funds which perform functions similar to those of government departments;

agencies engaged in “industrial” or “commercial” activities, primarily to service the requirements of their own governments;

agencies engaged primarily in the channelling of funds from one level of government to another or among organizations at the same level of government, e.g., bodies established by provincial legislation to help finance the capital programs of municipalities and school boards;

Workers’ Compensation Boards;

government-owned institutions such as those engaged in education, health and welfare services or administration of justice, e.g. agricultural schools, residences for handicapped persons, gaols, etc.;

Quebec Pension Plan;

non-trusted public service pension plans because their funds constitute an integral part of the consolidated revenue fund or which are otherwise available to the government in the financing of its operations;

working capital funds.

All entities classified to general government are consolidated into a single statistical unit for each government.

Revenues of each unit are classified by source and expenditures by function or purpose, while assets and liabilities conform with normal accounting classifications.

A government enterprise is an organized entity, usually corporate, established by a government to produce goods or services for sale on the open market at prices related to costs (this relationship being ascertainable from its own independent system of accounts), which has relatively autonomous management of its affairs and is staffed by other than public servants, though certain staff benefit schemes, e.g., superannuation, may be integrated with those of the public service of the parent government. The enterprises are classified by parent government and by Standard Industrial Classification. Financial statistics classifications for enterprises generally accord with those of commercial accounting.

L’univers est subdivisé en deux parties: l’univers gouvernemental et celui des entreprises publiques. L’univers gouvernemental comprend:

les ministères;

les fonds spéciaux (voir “la liste” des fonds spéciaux en annexe):

fonds administratifs et réglementaires dont les fonctions sont semblables à celles des ministères;

organismes ayant une activité “industrielle” ou “commerciale” pour répondre avant tout aux besoins des gouvernements dont ils relèvent;

organismes dont l’activité principale est l’acheminement de fonds d’un échelon de gouvernement à un autre ou entre des organismes d’un même échelon, comme ceux créés par des lois provinciales pour aider au financement des investissements des municipalités et des conseils scolaires;

commissions des accidents du travail;

les établissements appartenant à des gouvernements comme ceux qui s’occupent de l’éducation, de la santé et du bien-être social, ou de l’administration de la justice. Dans cette catégorie, entrent les écoles d’agriculture, les résidences pour personnes handicapées, les prisons, etc.

Le régime des rentes du Québec;

les régimes de pensions de la Fonction publique non constitués en fiducie parce que leurs fonds forment une partie intégrante du fonds consolidé du revenu ou sont de toute autre manière à la disposition du gouvernement pour le financement de ses activités;

les fonds de roulement.

Toutes les entités classées dans l’univers gouvernemental sont groupées en une seule unité statistique pour chaque gouvernement.

Les recettes de chaque unité sont classés par source et les dépenses par fonction ou but, tandis que les éléments d’actif et de passif suivent les classifications comptables normales.

Une entreprise publique est une personne morale, habituellement une société, créée par un gouvernement pour produire des biens ou services en vue de leur vente sur le marché libre à des prix établis en fonction des coûts (cela peut être vérifié à partir de son propre système indépendant de comptes), qui gère ses propres affaires de façon relativement autonome et dont le personnel n’est pas constitué de fonctionnaires, bien que certains avantages sociaux, comme la pension de retraite, puissent être intégrés à ceux du gouvernement dont elle relève. Les entreprises sont classées selon le gouvernement dont elles relèvent et les catégories de la Classification des activités économiques. La statistique financière des entreprises correspond généralement à la comptabilité commerciale.

While the foregoing outlines the bases on which the financial management system rests, the reader is urged to refer to the descriptive publication mentioned above to obtain the more detailed knowledge which is a prerequisite for the full comprehension and use of the statistics produced in accordance with this system. The full range of these statistical series is listed on the rear cover of the present publication.

The National Accounts Statistical System

A second national standardized system for the production of financial statistics of Canadian governments is contained in the framework of the Canadian System of National Accounts. While the financial management system depicts the expenditures made by government to discharge its functions, the relative importance of the different types of revenue raised to defray these expenditures, the means used to finance the deficit between revenue and expenditure or to dispose of any surplus of revenue over expenditure and the resulting financial situation of government; the economic analysis system is concerned with the economic effects of government activity. Although there are significant differences between the two systems in concepts and, particularly, in classifications, it is possible, as is shown in this publication, to cross-classify government financial data in economic terms. But, just as the resulting financial management statistics differ significantly from the estimates or public accounts from which they are derived, so the economic analysis statistics differ from the national income and expenditure accounts.

Coverage, Sources and Validity

The present publication covers the general government universe of each province and territory on an all-inclusive basis except for certain institutions for which complete financial reports are unavailable. These institutions are incorporated only to the extent of their financial transactions with their present governments; certain very minor revenues which these institutions obtain from other sources are omitted from the publication as are detailed analyses of their expenditures.

The financial statistics in this publication are derived from information contained in the public accounts of the governments and from the audited financial statements of their agencies. Additional detail is obtained in a few instances from correspondence with provincial and territorial authorities. The co-operation of provincial and territorial government officials is gratefully acknowledged.

The main tables in this publication have been reviewed by officials of the governments to which the data relates but final responsibility for the validity of the statistics remains with the Provincial Government Section of the Public Finance Division of Statistics Canada.

Même si nous venons d'esquisser les bases du système de gestion financière, nous prions le lecteur de se reporter à la publication mentionnée plus haut afin de mieux connaître ces bases, une condition essentielle à la parfaite compréhension et à l'utilisation des statistiques produites conformément à ce système. Vous trouverez la liste complète de ces séries statistiques sur la partie arrière de la couverture de cette publication.

Système statistique des comptes nationaux

Le système canadien de la comptabilité nationale est un deuxième système national normalisé pour la statistique financière des gouvernements canadiens. Alors que le système de la gestion financière présente les dépenses effectuées par les gouvernements pour s'acquitter de leurs fonctions, l'importance relative des différentes sources de recettes perçues pour assumer ces dépenses, les moyens utilisés pour financer le manque de recettes par rapport aux dépenses ou pour disposer l'excédent des recettes sur les dépenses et la situation financière finale des gouvernements; le système d'analyse économique s'intéresse, pour sa part, aux incidences économiques de leurs activités. En dépit de différences conceptuelles sensibles entre les deux systèmes, principalement dans les classifications, il est possible, comme le démontre cette publication, de recouper les données financières en termes économiques. Mais, tout comme les statistiques sur la gestion financière diffèrent considérablement des budgets ou des comptes publics dont elles sont dérivées, les résultats de l'analyse économique sont différents de ceux des comptes nationaux des recettes et dépenses.

Champ d'observation, sources et validité

La présente publication englobe toutes les activités gouvernementales de chaque province ou territoire, sauf certaines institutions pour lesquelles il n'existe pas de rapports financiers complets. Nous n'avons tenu compte de ces institutions que pour leurs transactions financières avec le gouvernement dont elles relèvent; cette publication ne prend pas en compte certaines recettes très faibles provenant d'autres sources et n'analyse pas leurs dépenses en détail.

Les statistiques financières de cette publication sont tirées de renseignements contenus dans les comptes publics des gouvernements et dans les états financiers vérifiés des organismes qui en dépendent. Dans quelques cas, des détails supplémentaires ont été obtenus directement des autorités provinciales ou territoriales. Nous remercions les fonctionnaires des provinces et territoires de la collaboration qu'ils nous ont accordée.

Les principaux tableaux de cette publication ont été vérifiés par les fonctionnaires compétents des gouvernements, mais c'est la Section des administrations provinciales, Division des finances publiques, Statistique Canada, qui a la responsabilité définitive des statistiques.

Revision of the Financial Management Statistics System

The most recent publication describing the Financial Management Statistics System (Catalogue 68-506) was issued in September 1972; amendments were issued in April 1974. Public Finance Division commenced a review of the System in 1979 and expects to issue a revised publication later in 1980. While this review has concentrated on strengthening the conceptual framework of the System, developments in government operations in the decade now ended together with changes in user requirements have necessitated some modifications to the revenue and expenditure classifications.

While no changes have been made to individual revenue classifications, "Taxes" have been re-aligned into five groups — "Income Taxes", "Property and Related Taxes", "Consumption Taxes", "Health and Social Insurance Levies", and "Miscellaneous". This arrangement is more logical than that previously employed which appeared to give undue prominence to certain relatively minor categories.

While the changes made to expenditure classifications are more noticeable they should not affect the continuity of the series except in one relatively minor instance.

The function "Social Welfare" has been renamed "Social Services" and re-structured to provide greater clarity. It now comprises the sub-functions "Social Security", "Labour Force Plans", "Family Allowances", "Veterans Benefits", "Social Welfare", "Tax Credits and Rebates", and "Other Social Services".

Because it has become increasingly difficult to distinguish between expenditures related to conservation and those aimed at development, the two functions, "Natural Resources" and "Agriculture, Trade and Industry, and Tourism", have been combined into a single function, "Resource Conservation and Industrial Development". All the sub-functions of both former functions are allocated to the new function.

The function "Supervision and Development of Regions" has been re-named more appropriately "Regional Planning and Development". While the overall concept remains unchanged, four sub-functions — "Planning and Zoning", "Community Development", "Regional Development" and "Other" — are also now identified.

The sub-function "Regulatory Services" has been re-defined and re-named "Regulatory Measures". Previously, all expenditures related to regulatory activities were assigned to this classification. Such assignment, however, is now recognized to conflict with one of the basic principles of the System under which an expenditure is classified in terms of the service thereby provided. As a consequence, where the purpose of a particular regulation or regulatory pro-

Révision du Système des statistiques de la gestion financière

La dernière publication décrivant le Système des statistiques de la gestion financière (no 68-506 au catalogue) remonte à septembre 1972, bien que des modifications aient été apportées en avril 1974. La Division des finances publiques a entrepris une révision du système en 1979 et compte en publier une nouvelle version en 1980. Quoique cette révision vise surtout à donner plus de rigueur au cadre conceptuel du système, l'évolution des activités gouvernementales au cours de la dernière décennie, accompagnée des changements qu'ont connus les besoins des utilisateurs, a rendu nécessaire la modification de la structure des recettes et des dépenses.

Aucune modification n'a été apportée aux rubriques portant sur les recettes, mais les "impôts" sont maintenant divisés en cinq groupes: "impôts sur le revenu", "impôts fonciers et impôts connexes", "taxes à la consommation", "cotisations aux régimes d'assurance-maladie et d'assurance sociale" et "impôts divers". Cette structure est plus logique que la précédente où certaines fonctions de moindre importance semblaient occuper une place prépondérante.

Bien que les modifications effectuées au chapitre des dépenses soient plus nombreuses, la continuité des séries ne devrait pas être menacée, sauf dans un cas d'assez peu d'importance.

La fonction "bien-être social" s'appelle maintenant "services sociaux" et est restructurée en vue d'une meilleure clarté. On y trouve les sous-fonctions "sécurité sociale", "régimes concernant la population active", "allocations familiales", "prestations aux anciens combattants", "bien-être social", "crédits et dégrèvements d'impôt" et "autres services de bien-être social".

Comme il est de plus en plus difficile de distinguer les dépenses affectées à la conservation de celles destinées au développement, les fonctions "ressources naturelles" et "agriculture, commerce et industrie, et tourisme" ont été groupées pour former la fonction "conservation des ressources naturelles et développement de l'industrie". Toutes les sous-fonctions des deux anciennes fonctions font maintenant partie de la nouvelle.

La fonction "surveillance et mise en valeur des régions" est maintenant appelée, de façon plus appropriée, "planification et aménagement des régions". Le concept général n'est pas modifié, mais quatre sous-fonctions sont maintenant définies: "urbanisme et zonage", "aménagement des agglomérations urbaines", "aménagement des régions" et "autres".

La sous-fonction "services de réglementation" a été redéfinie et s'intitule maintenant "mesures de réglementation". Auparavant, toutes les dépenses affectées aux activités de réglementation figuraient sous cette rubrique. Toutefois, on a constaté que cette façon de procéder dérogeait à l'un des principes fondamentaux du système voulant qu'une dépense soit classée selon le service auquel elle est affectée. Par conséquent, lorsque l'objet d'un règlement ou d'un programme réglementaire en particulier est de protéger ou d'encoura-

gram is to protect or foster a particular activity or industry, expenditures on the regulation or program are now classified under the same function as the related activity or industry. In the year under review the following expenditures, which would previously have been classified to "Regulatory Services", are now assigned to the functions as indicated in Text Table VIII.

Review of the 1977-78 Fiscal Year

Revenue

The gross general revenue of all provincial and territorial governments for the fiscal year ending March 31, 1978 was \$43,695.6 million, an increase of \$5,228.1 million or 13.6% over the previous fiscal year. This represents a significant decline in the average (17%) year-over-year growth rate of revenue since 1970. It appears to be attributable mainly to a slowdown in the overall rate of economic growth, e.g., corporation income tax revenue increased by only 3.4% over 1976-77 as compared with a longer term average of 19.1%.

At the same time, the effects of the revised federal-provincial fiscal arrangements introduced at the beginning of 1977 were evident in major changes in year-over-year growth rates for two principal revenue sources. Under these new arrangements the federal contributions to hospital insurance, medicare and post-secondary education programs are no longer tied to program costs but consist of a combination of cash payments and the transfer to provincial jurisdiction of additional income tax points. The cash transfers made under the Established Programs Financing Act are based on 50% of the 1975-76 national average per capita transfer escalated by the three year moving average rate of growth of Gross National Expenditure. The winding down of the Revenue Guarantee program also contributed to a drop in the year-over-year growth rate of general and specific purpose federal transfers to 4.6% from an average of 16.6% for 1970-77. It is worth noting in this connection that these transfers provide the main source of revenue for the four Atlantic provinces and for Manitoba (the two territories are, of course, a special case) whereas Alberta receives only 9.8% of its gross general revenue from this source.

Conversely, personal income taxes, which form the main source of revenue for Quebec (30.5%), Ontario (23%) and British Columbia (20.2%) showed an overall increase of 23.8% over the previous year compared with an average of 18.6% for the previous six years. Further evidence of the slower rate of growth of the economy is provided by consumption taxes-general sales taxes, motor fuel, tobacco, amusement and related taxes-which form the second most important revenue source for all provinces except Alberta and Saskatchewan. While the average year-over-year increase in the 1970-76 period was 13.5%, 1977-78 recorded an increase of only 8.8% over the previous

ger une certaine activité ou une certaine industrie, les dépenses consacrées au règlement ou au programme sont classées sous la fonction représentant l'activité ou l'industrie concernées. Pour l'année considérée, les dépenses suivantes, qui auraient été classées sous "services de réglementation" dans l'ancien système, figurent maintenant sous les fonctions désignées dans le tableau explicatif VIII.

Analyse de l'année financière 1977-78

Recettes

Les recettes générales brutes de l'ensemble des administrations provinciales et territoriales pendant l'année financière se terminant le 31 mars 1978 se sont chiffrées à \$43,695.6 millions, en hausse de \$5,228.1 millions (13.6%) sur l'exercice précédent. Il s'agit toutefois d'un recul par rapport au taux moyen de croissance annuelle (17%) observé depuis 1970, lequel est attribuable principalement au ralentissement de la croissance économique. Le produit de l'impôt sur le revenu des sociétés, par exemple, n'a crû que de 3.4% par rapport à l'année 1976-77, contre une moyenne de 19.1% sur une longue période.

Dans un même temps, la révision des arrangements fiscaux fédéraux-provinciaux survenue au début de 1977 a eu une influence sensible sur les taux de croissance annuelle de deux grandes sources de revenu. En effet, les contributions de l'administration fédérale au titre de l'assurance-hospitalisation, des soins médicaux et de l'enseignement postsecondaire ne sont plus liées aux frais des programmes; elles prennent plutôt la forme de paiements au comptant et d'un transfert de points d'impôt sur le revenu additionnels aux administrations provinciales. Les paiements aux comptant faits aux termes de la Loi sur le financement des programmes établis correspondent à la moitié du transfert national moyen par tête effectué en 1975-76, majorée par la moyenne sur trois ans du taux de croissance de la dépense nationale brute. La suppression graduelle du programme de garantie des recettes a également entraîné un fléchissement du taux de croissance annuelle des transferts fédéraux à des fins générales et particulières; ce taux est passé de 16.6% en moyenne pour la période allant de 1970 à 1977 à 4.6% en 1977-78. Signalons que ces transferts constituent la principale source de revenu des quatre provinces de l'Atlantique et du Manitoba (abstraction faite, il va de soi, du cas particulier des deux territoires), tandis que l'Alberta n'en retire que 9.8% de ses recettes générales brutes.

En revanche, l'impôt sur le revenu des particuliers, principale source de revenu du Québec (30.5%), de l'Ontario (23%) et de la Colombie-Britannique (20.2%), a progressé dans l'ensemble de 23.8%, tandis que l'augmentation enregistrée au cours des six années précédentes a été de 18.6% en moyenne. Le ralentissement de l'économie s'est également répercuté sur les taxes à la consommation (taxes générales de vente, taxes sur le carburant, le tabac, les spectacles et autres taxes du même genre), deuxième plus importante source de revenu pour toutes les provinces, sauf l'Alberta et la Saskatchewan. Le produit de ces taxes n'a crû que de 8.8% par rapport à l'exercice précédent, alors qu'il avait augmenté en moyenne de 13.5% entre 1970 et 1976. Outre l'impôt sur le

year. Apart from personal income tax, the only revenue source to show a major increase over its long term average pattern was, not unexpectedly, natural resource revenue which was 44% over the 1976-77 figure compared with an average increase of 30.8% for each of the preceding six years. It is worth noting that natural resource revenue, which accounted for 4% of all gross general revenue in 1970-71, accounted for 10% in 1977-78. Furthermore, in the latter year 74.9% of this particular revenue source accrued to Alberta, where it comprised 53.6% of gross general revenue while British Columbia had 10.5%, Saskatchewan 8.7% and the other provinces and territories shared the remaining 5.9%. Text Table I illustrates revenue sources as percentages of gross general revenue of each government in 1977-78 while Text Table III shows the year-to-year changes of the main sources from 1976-77 to 1977-78.

Expenditures

Gross general expenditure of all provinces and territories increased by 11.8% to \$43,585.0 in 1977-78 over 1976-77 compared with an average of 17.4% for each of the years 1970-71 to 1976-77. All major functions except debt charges repeated this deceleration in growth rates with health (an 8.6% increase compared to an average 16.1% for 1970-77) and social services (14.4% vs 22.9%) being particularly noticeable in this regard. These decreases appear to reflect policies of restraint on the part of the governments with the increase in debt charges (19.1% over 1976-77 as compared with an average 11.6% for the preceding six years reflecting the growth in borrowings in recent years. Among individual provinces and territories significant reductions from their average annual rates of increases among the four largest spenders-Ontario (9.8% vs 15.7%), Quebec (12.4% vs 18.1%), British Columbia (13.4% vs 19.9%) and Alberta (11.6% vs 20.2%)-more than offset increases by Prince Edward Island (23.4% vs 16.5%), Nova Scotia (17.4% vs 16.1%) and Manitoba (18.4% vs 16.9%). Text Table II depicts 1977-78 expenditure functions for each government as percentages of gross general expenditure for that year while Text Table IV shows the changes in the outlays on the main expenditure functions between 1977-78 and 1976-77.

Québec Pension Board

The data in this report for the province of Québec includes the revenues and expenditures of the Québec Pension Board, established by the province in 1965. (See Text Table V).

The only transactions, included at the provincial level (except Québec) as universal pension plans expenditures, are the contributions of provincial governments as employers to the Canada Pension Board.

revenu des particuliers, les revenus tirés des ressources naturelles sont les seuls à marquer une nette progression par rapport à leur hausse sur une longue période: ils se sont accrus de 44% en 1977-78, en regard de 30.8% en moyenne pendant les six années précédentes. Soulignons que les ressources naturelles étaient à l'origine de 4% des recettes générales brutes en 1970-71 et de 10% en 1977-78. De plus, 74.9% de ces revenus ont été perçus par l'Alberta, ce qui représentait 53.6% de ces recettes générales brutes; la Colombie-Britannique en a reçu 10.5%, la Saskatchewan, 8.7% et les autres provinces et les territoires, 5.9%. Le tableau explicatif I présente les sources de revenu de chaque administration en 1977-78 en pourcentage de ses recettes générales brutes, tandis que le tableau explicatif III fait ressortir l'évolution des principales sources de revenu entre 1976-77 et 1977-78.

Dépenses

Les dépenses générales brutes de l'ensemble des administrations provinciales et territoriales se sont élevées à \$43,585 millions en 1977-78, ce qui représente une augmentation de 11.8% en regard d'une hausse moyenne de 17.4% pendant les années allant de 1970-71 à 1976-77. Ce repli a été observé dans toutes les principales fonctions, exception faite du service de la dette; il a été particulièrement sensible dans les fonctions de la santé (hausse de 8.6% contre 16.1% en moyenne entre 1970 et 1977) et des services sociaux (hausse de 14.4% contre 22.9%). Les politiques de restriction des dépenses adoptées par les gouvernements semblent expliquer le fléchissement des taux de croissance, alors que la progression du service de la dette (19.1% par rapport à 1976-77, contre une moyenne de 11.6% pendant les six années précédentes) résulte d'un accroissement des emprunts effectués depuis quelques années. Concernant les provinces et les territoires en particulier, on constate que le fléchissement du pourcentage d'augmentation des dépenses par rapport à la croissance annuelle moyenne, des provinces qui dépensent le plus, à savoir l'Ontario (9.8% contre 15.7%), le Québec (12.4% contre 18.1%), la Colombie-Britannique (13.4% contre 19.9%) et l'Alberta (11.6% contre 20.2%), a annulé la progression réalisée par l'Île-du-Prince-Édouard (23.4% contre 16.5%), la Nouvelle-Écosse (17.4% contre 16.1%) et le Manitoba (18.4% contre 16.9%). Le tableau explicatif II présente les fonctions de dépense de chaque administration en 1977-78 en pourcentage des dépenses générales brutes, tandis que l'évolution des principales fonctions de dépense entre 1976-77 et 1977-78 est exposée au tableau explicatif IV.

Régie des rentes du Québec

Les données de la province de Québec figurant dans la présente publication comprennent les recettes et des dépenses de la Régie des rentes du Québec, organisme créé par la province en 1965. (Voir le tableau explicatif V).

Les seules transactions incluses au niveau provincial (sauf Québec) comme dépenses pour les régimes universaux de rentes, sont les contributions des gouvernements provinciaux à titre d'employeur au Régime de pension du Canada. Étant

Being a federal agency, the revenues and expenditures are included in the federal government universe.

Text Table VI shows the position of the province of Québec in the case where the Québec Pension Board would have been considered a sub-sector of the provincial government universe instead of part of the universe.

Inter-Provincial Comparability

The “gross general” concept of revenue and expenditure as applied in this publication provides a measure of inter-provincial comparability but only at the general government level. Because of the varying importance of provincial government enterprises in the activities of the provincial public sub-sector in the ten provinces and the two territories and, even more, because of the divergences in the allocation of responsibilities between provincial and local governments among the provinces, complete comparability can only be achieved when provincial government and provincial enterprise operations are integrated and provincial and local government transactions are consolidated. This consolidation of the revenues and expenditures of the provincial and local government levels into a combined provincial-local statistical universe is presented in the Statistics Canada publication *Consolidated Government Finance* (Catalogue 68-202) in which the inter-level transactions are eliminated.

Explanatory Comments

Tables 1 and 2 Gross General Revenue and Expenditure

These tables include the current and capital revenue and expenditure transactions of the provincial government universe.

In order to achieve a measure of inter-provincial comparability, certain adjustments have been made to the figures shown in the provincial accounts. Reconciliations of “gross general” revenue and expenditure with provincial accounts are found in Tables 3 and 4. The adjustments are explained more fully in the commentary to those tables.

Text Table VII indicates the detail of the “Miscellaneous taxes — other” item on Table 1.

Tables 3 and 4 Reconciliation of Gross General Revenue and Expenditure with Provincial Accounts

These tables are included to explain the difference between current and capital revenue and expenditure as presented in provincial and territorial accounts, and gross general revenue and expenditure as compiled for the financial management series.

un organisme fédéral, les recettes et les dépenses sont inclus dans l'univers gouvernemental fédéral.

Le tableau explicatif VI présente la position de la province de Québec dans le cas où la Régie des rentes du Québec serait considérée comme une sous-section de l'univers gouvernemental provincial plutôt que partie intégrante de l'univers.

Comparabilité interprovinciale

Le concept des recettes et des dépenses “générales brutes” tel qu’il s’applique ici fournit une mesure de la comparabilité inter-provinciale, mais au niveau de l’univers gouvernemental seulement. Étant donné que l’importance des entreprises publiques provinciales dans les activités du sous-secteur public provincial des dix provinces et des deux territoires varie, et plus encore par suite des divergences dans l’attribution des responsabilités entre les gouvernements provinciaux et les administrations locales d’une province à l’autre, on ne peut obtenir une comparabilité parfaite que lorsque les opérations des gouvernements provinciaux et de leurs entreprises sont intégrées et lorsque les transactions publiques provinciales et locales sont consolidées. Cette consolidation des recettes et des dépenses publiques provinciales et locales en un univers statistique combiné provincial-local, est exposé dans la publication de Statistique Canada intitulée *Les Finances Publiques Consolidées* (numéro 68-202 au catalogue), et dans laquelle les opérations entre divers niveaux sont éliminées.

Commentaires explicatifs

Tableaux 1 et 2 Recettes et dépenses générales brutes

Ces tableaux comprennent les recettes et les dépenses ordinaires et de nature capitale de l’univers des gouvernements provinciaux.

Dans un souci de comparabilité interprovinciale, on a apporté certains ajustements aux chiffres figurant dans les comptes provinciaux. Les rapprochements des recettes et des dépenses “générales brutes” des comptes provinciaux se trouvent aux tableaux 3 et 4. Les ajustements sont expliqués plus en détail dans les commentaires de ces tableaux.

Le tableau explicatif VII donne le détail du poste “Diverses impositions — autres” du tableau 1.

Tableaux 3 et 4 Rapprochement des recettes et des dépenses générales brutes avec celles des comptes provinciaux

On a inclus ces tableaux pour expliquer la différence entre les recettes et les dépenses ordinaires et de nature capitale tels qu’ils figurent dans les comptes des provinces et des territoires, et les recettes et dépenses générales brutes établis pour les séries de la gestion financière.

The revenues and expenditures of the special funds are accounted for separately and are not included in provincial or territorial revenues and expenditures despite the fact that the agencies in question perform functions that are really of a governmental nature. For purposes of establishing gross general revenue and expenditure, the transactions of these funds are added to budgetary transactions.

Because of variations in the extent to which provincial and territorial governments deduct amounts from revenue and expenditure in their financial statements, adjustments also are made in the series to reverse all of these deductions and to arrive at "gross" revenue and expenditure.

The trading operations of liquor boards are treated in the financial management series as enterprises and only their remitted trading profits are included in provincial or territorial revenues. In some provinces, however, liquor boards also carry out regulatory or control functions and derive revenue from these activities. This revenue, generally in the form of licences and permits, and the related expenditure are considered to be general government revenue and expenditure. Therefore, they represent an adjustment to the revenue and expenditure presented in the provincial government financial statements.

A uniform approach to the treatment of working capital funds in the financial management series results in adjustments to both revenue and expenditure. This compensates for the different presentation of such funds in the provincial and territorial accounts.

An attempt is also made to apply a consistent approach to recoveries of expenditure and refunds of revenue. A number of items regarded by the provinces as revenue or expenditure are considered to represent recoveries of current and prior year expenditures or refunds of current year revenues. Consequently they are excluded from gross general revenue and expenditure.

Non-revenue and surplus receipts and non-expenditure and surplus payments represent items which are not regarded as provincial government revenue and expenditure transactions in this series. They also include such items as repayments of loans and advances, revenues collected on behalf of other jurisdictions, purchases and sales of investments, loans and advances and other surplus account transactions.

The deduction of intragovernment transactions represents the elimination of transactions among the component parts of the general government statistical universe for each province. Departmental expenditures included in the revenues of special funds and vice-versa, revenues of one special fund treated as expenditure in another special fund, and transfers of funds between departments would all result in the duplication of revenue and expenditure when these

Les recettes et les dépenses des fonds spéciaux sont comptabilisés séparément et ne sont pas pris en compte dans les recettes et les dépenses des gouvernements provinciaux ou territoriaux en dépit du fait que les activités des organismes en question sont réellement de nature gouvernementale. Pour établir les recettes et les dépenses générales brutes, on ajoute les opérations de ces fonds aux opérations budgétaires.

Les sommes que les gouvernements provinciaux et territoriaux déduisent dans leurs états financiers des recettes et des dépenses pouvant varier, on apporte également des ajustements aux séries pour annuler toutes ces déductions et obtenir les recettes et les dépenses "brutes".

Les activités commerciales des régies des alcools sont considérées dans les séries de la gestion financière comme des entreprises publiques et seuls leurs profits d'exploitation remis figurent dans les recettes provinciales ou territoriales. Cependant, dans certaines provinces, les régies des alcools ont également des fonctions réglementaires ou de contrôle d'où elles tirent des recettes. Ces dernières, généralement sous la forme de droits et de permis, ainsi que les dépenses correspondantes, sont considérées comme des recettes et des dépenses de l'univers gouvernemental et constituent donc un ajustement aux recettes et aux dépenses figurant dans les états financiers des gouvernements provinciaux.

Une approche uniforme dans le cas des fonds de roulement dans les séries de la gestion financière a donné lieu à des ajustements aux recettes et aux dépenses pour compenser la différence de présentation de ces fonds dans les comptes provinciaux et territoriaux.

On essaie également d'utiliser une approche homogène dans le cas des recouvrements de dépenses et des remboursements de recettes. Un certain nombre de postes considérés par les provinces comme des recettes ou des dépenses sont considérés comme des recouvrements des dépenses de l'année courante ou comme des remboursements des recettes de l'année courante, et sont de ce fait exclus des recettes et des dépenses générales brutes.

Les entrées de fonds qui ne sont pas des recettes et les entrées au titre de l'excédent, ainsi que les paiements qui ne sont pas des dépenses et ceux qui sont prélevés sur l'excédent, constituent les postes qui ne sont pas considérés comme des recettes et des dépenses des gouvernements provinciaux dans cette série; elles comprennent notamment les remboursements l'emprunts et d'avances, les recettes recueillis pour le compte d'autre autorités, les achats et les ventes de placements, les prêts et avances et les autres opérations au titre du compte de l'excédent.

La déduction des transactions entre les composantes du gouvernement consiste à éliminer les opérations entre les éléments constitutifs de l'univers statistique gouvernemental de chaque province. Les dépenses d'un ministère comprises dans les recettes d'un fonds spécial et inversement, les recettes d'un fonds spécial considérées comme dépenses dans un autre fonds spécial, les transferts de fonds entre les ministères; tous ces éléments amèneraient un double comptage des recettes et des dépenses lorsque l'on regroupe ces

entities are combined to form the statistical universe for any particular province. It, therefore, becomes necessary to identify and eliminate these interfund or intra universe transactions.

Table 5 Economic Classification of Gross General Revenue

This table classified the gross general revenue of the financial management series by economic sources. The sources of government revenue for economic purposes are direct taxes on persons and business, indirect taxes, other current transfers from persons, transfers from other levels of government, investment income and other.

Direct taxes. Direct taxes include personal and corporation income taxes, payroll tax, succession duties and the levies imposed on logging and mining profits. Employee contributions to non-trusted pension plans, contributions to the Québec Pension Board and Workmen's Compensation Board assessments are also considered as direct taxes — persons.

Indirect taxes. Indirect taxes encompass sales taxes, motor fuel taxes, insurance premiums, capital and place of business taxes, amusement taxes and real and personal property taxes. Privileges, licences and permits purchased by business entities such as motor vehicles licences, natural resource exploration permits, etc., are also regarded as indirect taxes.

Other Current Transfers from Persons. Transfers from persons consist of health insurance premiums, personal motor vehicle permits and licences, and other licences and permits such as fishing, hunting and marriage licences. Fines and penalties also fall into this economic category.

Transfers from Other Levels of Government. This category includes both general and specific purpose transfers from federal and local governments. The provincial share of federal estate tax, the tax on undistributed income and income tax on privately owned public utilities are classified as transfer payments at the provincial government level.

Investment income. Interest, dividends and profits on foreign exchange, royalties and the remitted profits of government enterprises as well as liquor boards are included under this economic classification.

Other revenue. For example, sales of goods and services sales of land and fixed assets and other revenue items are not regarded as adding to production in the economic sense.

entités pour former l'univers statistique d'une province donnée. Il devient donc nécessaire d'isoler et d'éliminer ces opérations entre fonds ou à l'intérieur de l'univers.

Tableau 5 Classification économique des recettes générales brutes

Ce tableau classe les recettes générales brutes des séries de la gestion financière selon les sources économiques. Les sources des recettes publiques aux fins économiques sont les impôts directs des particuliers et des entreprises, les impôts indirects, les autres transferts courants des particuliers, les transferts d'autres niveaux d'administration publique, les revenus de placements et autres.

Impôts directs. Les impôts directs comprennent les impôts sur le revenu des particuliers et des corporations, l'impôt sur la feuille de paie, les droits successoraux et les droits imposés sur les bénéfices forestiers et miniers. Les cotisations des employés aux régimes de pension gérés par le gouvernement, les cotisations au Régimes des rentes du Québec et les versements à la Caisse d'indemnisation des accidents du travail sont également considérés comme des impôts directs.

Impôts indirects. Les impôts indirects comprennent les taxes de vente, les taxes sur les carburants, les taxes sur le revenu de primes des compagnies d'assurance, les taxes sur le capital et les taxes d'affaires, les taxes sur les spectacles ainsi que les impôts sur la propriété foncière et personnelle. Les privilèges, droits et permis achetés par les entités commerciales, tels que les permis pour véhicules automobiles, les permis portant sur l'exploitation des ressources naturelles, etc., sont également considérés comme des impôts indirects.

Autres transferts courants des particuliers. Les transferts des particuliers comprennent les primes personnelles pour véhicules automobiles et les droits et autres permis tels que les permis de pêche, de chasse et de mariage. Les amendes et pénalités entrent également dans cette catégorie économique.

Transferts d'autres niveaux d'administration publique. Cette catégorie comprend les transferts à des fins générales et à des fins spécifiques du gouvernement fédéral et des administrations locales. La part provinciale de l'impôt fédéral sur les biens transmis par décès, l'impôt sur le revenu non distribué des sociétés et l'impôt sur le revenu des services privés d'utilité publique sont classés comme des transferts au niveau du gouvernement provincial.

Revenus de placements. Les intérêts, dividendes et le profit sur le change étranger, les redevances et les bénéfices déclarés des entreprises publiques ainsi que les régies des alcools figurent sous cette rubrique.

Autres recettes. Par exemple, les ventes de biens et de services les ventes de terrains et d'immobilisations ainsi que d'autres éléments de revenu dont on ne considère pas, au sens économique, qu'ils contribuent à la production.

Table 6 Economic Classification of Gross General Expenditure

The objects of expenditure used in the economic classification are purchases of goods and services and transfer payments to persons, business and other levels of government.

Purchases of Goods and Services This classification includes all current expenditures of government on such salaries and wages, materials and supplies, travelling expenses, professional services, purchases of land, write-offs of bad debts and other final expenditures. For purposes of this publication, transfer payments to public hospitals are also treated as purchases of goods and services.

Transfers to Persons. Transfers to persons consist of payments to individuals and non-profit institutions for which no direct service is rendered by the recipients. Included in this latter group are universities, other post-secondary educational facilities and private non-commercial organizations and associations. For purposes of this publication, interest on the public debt is also treated as a transfer to persons.

Transfers to Business. This category includes both subsidies for current operations and capital assistance payments made to business. Subsidies for current operations represent payments designed to make it possible for producers to stabilize or lower prices while capital assistance covers grants made to commercial enterprises to assist in the acquisition of new facilities or machinery and equipment. Home-owners' subsidies paid by provincial governments in Saskatchewan, Alberta and British Columbia are also included in transfers to business.

Transfers to Other Levels of Government. Transfers to other levels of government consist of grants to local governments. The term "local government" refers to municipalities, local school boards and other municipally organized bodies such as conservation authorities.

Table 7 Historical Summary of Gross General Revenue and Expenditure

This table presents actual data for four years, estimated data for a year on gross general revenue by source and gross general expenditure by function for each province and territory. Data are also presented at the Canada total. Actual data are obtained from the present publication while estimated amounts are to be found in the publication entitled *Provincial Government Finance — Revenue and Expenditure* (Estimates) (Catalogue 68-205).

Tableau 6 Classification économique des dépenses générales brutes

Les articles de dépenses utilisés dans la classification économique sont les achats de biens et de services et les paiements de transfert aux particuliers, aux entreprises et à d'autres niveaux d'administration publique.

Achats de biens et de services. Sous cette catégorie figurent toutes les dépenses ordinaires des gouvernements pour des postes tels que les traitements et salaires, les matières et les fournitures, les dépenses de voyage, les services professionnels les achats de terrain, l'amortissement des créances douteuses et autres dépenses finales. Dans la présente publication les transferts aux hôpitaux publics sont également considérés comme des achats de biens et services.

Transferts aux particuliers. Les transferts aux particuliers consistent en paiements aux particuliers et aux institutions sans but lucratif et en échange desquels les bénéficiaires ne rendent aucun service direct. Dans cette catégorie se trouvent les universités, les autres établissements d'enseignement post-secondaire ainsi que les organismes et associations privés non commerciaux. Dans la présente publication, l'intérêt sur la dette publique est également considéré comme un transfert à des particuliers.

Transferts aux entreprises. Sous cette rubrique entrent les subventions au titre des opérations ordinaires et les paiements sous forme de subventions pour fins d'immobilisation versés aux entreprises. Les subventions au titre des opérations ordinaires représentent des paiements destinés à permettre aux producteurs de stabiliser ou d'abaisser leurs prix, cependant que les subventions pour fins d'immobilisation portent sur des transferts consentis aux entreprises commerciales pour les aider à acquérir de nouvelles installations ou des machines et du matériel. Les subventions aux propriétaires de maisons payées par les gouvernements de la Saskatchewan, de l'Alberta et de la Colombie-Britannique font également partie des transferts aux entreprises.

Transferts à d'autres niveaux d'administration publique. Les transferts à d'autres niveaux d'administration publique comprennent les allocations aux administrations publiques locales. Par "administration publique locale", on entend les municipalités, les conseils scolaires locaux et autres formations organisées en municipalités, comme par exemple les offices de conservation.

Tableau 7 Sommaire chronologique des recettes et des dépenses générales brutes

Ce tableau regroupe les données réelles pour quatre années et les données estimatives pour une années en ce qui concerne les recettes générales brutes par source et les dépenses générales brutes par fonction, par province et par territoire et pour l'ensemble du Canada. Les chiffres réels proviennent de la présente publication, tandis que les estimations sont extraites de la publication intitulée — *Les Finances des gouvernements provinciaux — Revenus et dépenses* (Prévisions) numéro 68—205 au catalogue.

Established Programs Act

Previously, the payments received under the Established Programs Act (Interim Arrangements) were treated as general purposes transfers. Since 1974-75, they are treated as specific purpose transfers received for health and social welfare. They consist of operating cost adjustments (health \$97,229,248; social welfare \$365,052,453), in addition to the 16% abatement for the hospital insurance program (representing \$181,171,752) and the 5% abatement for the welfare program (representing \$204,233,048).

La loi sur les programmes établis

Les paiements versés en vertu de la loi sur les programmes établis (Arrangements provisoires) étaient traités auparavant comme les transferts à des fins générales. Depuis 1974-75, ils sont considérés comme des transferts à des fins spécifiques reçus pour la santé et le bien-être social. Ils consistent en des ajustements du coût d'opération (santé \$97,229,248; bien-être social \$365,052,453), en plus du 16% d'abattement fiscal pour le programme d'assurance-hospitalisation (représentant \$181,171,752) et du 5% d'abattement fiscal pour le programme de bien-être (représentant \$204,233,048).

TEXT TABLE I. Revenue Sources as Percentage of Gross General Revenue

| | Source | New- foundland — Terre- Neuve | Prince Edward Island — Île-du- Prince- Edouard | Nova Scotia — Nouvelle- Ecosse | New Brunswick — Nouveau- Brunswick | Québec | Ontario | Manitoba |

Symbols

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
 - nil or zero.
- - amount too small to be expressed.
- P preliminary figures.
- † revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

Because of rounding, totals and sub-totals for statistical tables may differ slightly from the sum of their component parts.

The reader is cautioned that data for fiscal years prior to the 1970 issue of this publication are not comparable because of changes in coverage. To assist users, the Public Finance Division has undertaken to provide the principal items of information required to adjust data for the years 1965 to 1969 to the new basis. This information may be obtained upon request from the Public Finance Division, Statistics Canada, Ottawa.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
 - néant ou zéro.
- - nombres infimes.
- P nombres provisoires.
- † nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTA

À cause de l'arrondissement des chiffres, les totaux et sous-totaux ne correspondent pas toujours à l'addition de leurs composants.

Le lecteur est averti que les données de cette publication pour les années fiscales précédentes à 1970 ne sont pas directement comparable par suite des changements apportés à la couverture statistique. Pour venir en aide aux utilisateurs, la Division des finances publiques a entrepris de fournir les principales informations nécessaires à l'ajustement sur la nouvelle base des données pour les années 1965 à 1969. Ces informations sont disponibles sur demande auprès de la Division des finances publiques, Statistique Canada, Ottawa.

Introduction

This publication presents the revenues and expenditures of the governments of each of the Canadian provinces and territories in the form of government financial management statistics. The primary objective of the publication is to meet the needs of users of financial information pertaining to the activities of these governments by converting the idiosyncratic data produced by each government into standardized statistics which are compatible as between these governments (and also with those of other levels of government produced by the Public Finance Division of Statistics Canada) and are consistent from one reference period to another.

The Financial Management Statistics System

The concepts and classifications underlying this statistical system are described in detail in the publication “The Canadian System of Government Financial Management Statistics” (Catalogue (68-506). Canadian governments at all three levels — federal, provincial and local — display much the same organizational structure — a legislature to which is subordinated a central core of departments to which, in turn, are attached numbers of agencies with varying degrees of autonomy. However, this general similarity of structure disappears when a detailed examination is made. Similarly-named entities perform quite different roles in different governments; services provided by a department in one government are provided by an agency in a second and are not provided at all in a third; and, while most agencies provide “government-type” services, others provide goods or services which in other jurisdiction could be, and often are, provided by non government commercial entities. Furthermore, since most government finance reports are designed to show administrative accountability and hence are closely related to organizational structures, the raw data contained in these reports are practically useless for any study which seeks to relate the financial activities of one government to those of another.

The Canadian System of Government Financial Management Statistics seeks to overcome the lack of homogeneity in raw government financial information at the provincial/territorial level in the following ways:

Introduction

Cette publication présente les recettes et dépenses publiques de chaque province ou territoire du Canada sous forme de statistiques de la gestion financière des gouvernements. Elle vise d'abord à répondre aux besoins des utilisateurs en renseignements financiers relatifs aux activités de ces gouvernements en transformant les données particulières produites par chacun en statistiques normalisées pour les divers gouvernements (compatibles avec celles produites par la Division des finances publiques de Statistique Canada sur d'autres niveaux de gouvernement) et comparables d'une période de référence à une autre.

Système statistique de la gestion financière

Les concepts et classifications qui sous-tendent ce système statistique sont décrits en détail dans la publication “Le système canadien des statistiques de la gestion financière” (no 68-506 au catalogue). Les trois paliers de gouvernement au Canada — fédéral, provincial et local — se ressemblent beaucoup; ils comprennent une assemblée législative dont relève un groupe central de ministères ou services auxquels se rattachent une grande quantité d'organismes jouissant de divers degrés d'autonomie. Cependant, cette similitude de structure ne soutient pas un examen détaillé. Des ministères ou services ayant des noms semblables diffèrent sensiblement dans le cas de certains gouvernements; certains services fournis par un ministère dans une province le sont par un organisme dans une autre et ne le sont pas dans une troisième; de plus, bien que la plupart des organismes assurent des services “publics”, d'autres organismes fournissent des biens ou services qui, ailleurs, pourraient être fournis, et le sont souvent, par l'entreprise privée. Comme la plupart des rapports financiers des gouvernements font état de la responsabilité administrative et, par conséquent, suivent de près la structure de l'organisation, les données qu'ils renferment sont presque inutiles pour toute étude visant à comparer les activités financières de divers gouvernements.

Le système canadien des statistiques de la gestion financière cherche à corriger le manque d'homogénéité entre les renseignements financiers fournis par les diverses provinces ou territoires par les moyens suivants:

The government universe is divided in two parts — general government and government enterprises. The general government consists of:

Departments of government;

special funds (see “Appendix” for the list of special funds included in this report):

administrative and regulatory funds which perform functions similar to those of government departments;

agencies engaged in “industrial” or “commercial” activities, primarily to service the requirements of their own governments;

agencies engaged primarily in the channelling of funds from one level of government to another or among organizations at the same level of government, e.g., bodies established by provincial legislation to help finance the capital programs of municipalities and school boards;

Workers’ Compensation Boards;

government-owned institutions such as those engaged in education, health and welfare services or administration of justice, e.g. agricultural schools, residences for handicapped persons, gaols, etc.;

Quebec Pension Plan;

non-trusted public service pension plans because their funds constitute an integral part of the consolidated revenue fund or which are otherwise available to the government in the financing of its operations;

working capital funds.

All entities classified to general government are consolidated into a single statistical unit for each government.

Revenues of each unit are classified by source and expenditures by function or purpose, while assets and liabilities conform with normal accounting classifications.

A government enterprise is an organized entity, usually corporate, established by a government to produce goods or services for sale on the open market at prices related to costs (this relationship being ascertainable from its own independent system of accounts), which has relatively autonomous management of its affairs and is staffed by other than public servants, though certain staff benefit schemes, e.g., superannuation, may be integrated with those of the public service of the parent government. The enterprises are classified by parent government and by Standard Industrial Classification. Financial statistics classifications for enterprises generally accord with those of commercial accounting.

L’univers est subdivisé en deux parties: l’univers gouvernemental et celui des entreprises publiques. L’univers gouvernemental comprend:

les ministères;

les fonds spéciaux (voir “la liste” des fonds spéciaux en annexe):

fonds administratifs et réglementaires dont les fonctions sont semblables à celles des ministères;

organismes ayant une activité “industrielle” ou “commerciale” pour répondre avant tout aux besoins des gouvernements dont ils relèvent;

organismes dont l’activité principale est l’acheminement de fonds d’un échelon de gouvernement à un autre ou entre des organismes d’un même échelon, comme ceux créés par des lois provinciales pour aider au financement des investissements des municipalités et des conseils scolaires;

commissions des accidents du travail;

les établissements appartenant à des gouvernements comme ceux qui s’occupent de l’éducation, de la santé et du bien-être social, ou de l’administration de la justice. Dans cette catégorie, entrent les écoles d’agriculture, les résidences pour personnes handicapées, les prisons, etc.

Le régime des rentes du Québec;

les régimes de pensions de la Fonction publique non constitués en fiducie parce que leurs fonds forment une partie intégrante du fonds consolidé du revenu ou sont de toute autre manière à la disposition du gouvernement pour le financement de ses activités;

les fonds de roulement.

Toutes les entités classées dans l’univers gouvernemental sont groupées en une seule unité statistique pour chaque gouvernement.

Les recettes de chaque unité sont classées par source et les dépenses par fonction ou but, tandis que les éléments d’actif et de passif suivent les classifications comptables normales.

Une entreprise publique est une personne morale, habituellement une société, créée par un gouvernement pour produire des biens ou services en vue de leur vente sur le marché libre à des prix établis en fonction des coûts (cela peut être vérifié à partir de son propre système indépendant de comptes), qui gère ses propres affaires de façon relativement autonome et dont le personnel n’est pas constitué de fonctionnaires, bien que certains avantages sociaux, comme la pension de retraite, puissent être intégrés à ceux du gouvernement dont elle relève. Les entreprises sont classées selon le gouvernement dont elles relèvent et les catégories de la Classification des activités économiques. La statistique financière des entreprises correspond généralement à la comptabilité commerciale.

While the foregoing outlines the bases on which the financial management system rests, the reader is urged to refer to the descriptive publication mentioned above to obtain the more detailed knowledge which is a prerequisite for the full comprehension and use of the statistics produced in accordance with this system. The full range of these statistical series is listed on the rear cover of the present publication.

The National Accounts Statistical System

A second national standardized system for the production of financial statistics of Canadian governments is contained in the framework of the Canadian System of National Accounts. While the financial management system depicts the expenditures made by government to discharge its functions, the relative importance of the different types of revenue raised to defray these expenditures, the means used to finance the deficit between revenue and expenditure or to dispose of any surplus of revenue over expenditure and the resulting financial situation of government; the economic analysis system is concerned with the economic effects of government activity. Although there are significant differences between the two systems in concepts and, particularly, in classifications, it is possible, as is shown in this publication, to cross-classify government financial data in economic terms. But, just as the resulting financial management statistics differ significantly from the estimates or public accounts from which they are derived, so the economic analysis statistics differ from the national income and expenditure accounts.

Coverage, Sources and Validity

The present publication covers the general government universe of each province and territory on an all-inclusive basis except for certain institutions for which complete financial reports are unavailable. These institutions are incorporated only to the extent of their financial transactions with their present governments; certain very minor revenues which these institutions obtain from other sources are omitted from the publication as are detailed analyses of their expenditures.

The financial statistics in this publication are derived from information contained in the public accounts of the governments and from the audited financial statements of their agencies. Additional detail is obtained in a few instances from correspondence with provincial and territorial authorities. The co-operation of provincial and territorial government officials is gratefully acknowledged.

The main tables in this publication have been reviewed by officials of the governments to which the

Même si nous venons d'esquisser les bases du système de gestion financière, nous prions le lecteur de se reporter à la publication mentionnée plus haut afin de mieux connaître ces bases, une condition essentielle à la parfaite compréhension et à l'utilisation des statistiques produites conformément à ce système. Vous trouverez la liste complète de ces séries statistiques sur la partie arrière de la couverture de cette publication.

Système statistique des comptes nationaux

Le système canadien de la comptabilité nationale est un deuxième système national normalisé pour la statistique financière des gouvernements canadiens. Alors que le système de la gestion financière présente les dépenses effectuées par les gouvernements pour s'acquitter de leurs fonctions, l'importance relative des différentes sources de recettes perçues pour assumer ces dépenses, les moyens utilisés pour financer le manque de recettes par rapport aux dépenses ou pour disposer l'excédent des recettes sur les dépenses et la situation financière finale des gouvernements; le système d'analyse économique s'intéresse, pour sa part, aux incidences économiques de leurs activités. En dépit de différences conceptuelles sensibles entre les deux systèmes, principalement dans les classifications, il est possible, comme le démontre cette publication, de recouper les données financières en termes économiques. Mais, tout comme les statistiques sur la gestion financière diffèrent considérablement des budgets ou des comptes publics dont elles sont dérivées, les résultats de l'analyse économique sont différents de ceux des comptes nationaux des recettes et dépenses.

Champ d'observation, sources et validité

La présente publication englobe toutes les activités gouvernementales de chaque province ou territoire, sauf certaines institutions pour lesquelles il n'existe pas de rapports financiers complets. Nous n'avons tenu compte de ces institutions que pour leurs transactions financières avec le gouvernement dont elles relèvent; cette publication ne prend pas en compte certaines recettes très faibles provenant d'autres sources et n'analyse pas leurs dépenses en détail.

Les statistiques financières de cette publication sont tirées de renseignements contenus dans les comptes publics des gouvernements et dans les états financiers vérifiés des organismes qui en dépendent. Dans quelques cas, des détails supplémentaires ont été obtenus directement des autorités provinciales ou territoriales. Nous remercions les fonctionnaires des provinces et territoires de la collaboration qu'ils nous ont accordée.

Les principaux tableaux de cette publication ont été vérifiés par les fonctionnaires compétents des gouvernements,

data relates but final responsibility for the validity of the statistics remains with the Provincial Government Section of the Public Finance Division of Statistics Canada.

Revision of the Financial Management Statistics System

The most recent publication describing the Financial Management Statistics System (Catalogue 68-506) was issued in September 1972; amendments were issued in April 1974. Public Finance Division commenced a review of the System in 1979 and expects to issue a revised publication later in 1981. While this review has concentrated on strengthening the conceptual framework of the System, developments in government operations in the decade now ended together with changes in user requirements have necessitated some modifications to the revenue and expenditure classifications.

While no changes have been made to individual revenue classifications, "Taxes" have been re-aligned into five groups — "Income Taxes", "Property and Related Taxes", "Consumption Taxes", "Health and Social Insurance Levies", and "Miscellaneous". This arrangement is more logical than that previously employed which appeared to give undue prominence to certain relatively minor categories.

While the changes made to expenditure classifications are more noticeable they should not affect the continuity of the series except in one relatively minor instance.

The function "Social Welfare" has been renamed "Social Services" and re-structured to provide greater clarity. It now comprises the sub-functions "Social Security", "Labour Force Plans", "Family Allowances", "Veterans Benefits", "Social Welfare", "Tax Credits and Rebates", and "Other Social Services".

Because it has become increasingly difficult to distinguish between expenditures related to conservation and those aimed at development, the two functions, "Natural Resources" and "Agriculture, Trade and Industry, and Tourism", have been combined into a single function, "Resource Conservation and Industrial Development". All the sub-functions of both former functions are allocated to the new function.

The function "Supervision and Development of Regions" has been re-named more appropriately "Regional Planning and Development". While the overall concept remains unchanged, four sub-functions — "Planning and Zoning", "Community Development", "Regional Development" and "Other" — are also now identified.

The sub-function "Regulatory Services" has been re-defined and re-named "Regulatory Measures".

mais c'est la Section des administrations provinciales, Division des finances publiques, Statistique Canada, qui a la responsabilité définitive des statistiques.

Révision du Système des statistiques de la gestion financière

La dernière publication décrivant le Système des statistiques de la gestion financière (no 68-506 au catalogue) remonte à septembre 1972, bien que des modifications aient été apportées en avril 1974. La Division des finances publiques a entrepris une révision du système en 1979 et compte en publier une nouvelle version en 1981. Quoique cette révision vise surtout à donner plus de rigueur au cadre conceptuel du système, l'évolution des activités gouvernementales au cours de la dernière décennie, accompagnée des changements qu'ont connus les besoins des utilisateurs, a rendu nécessaire la modification de la structure des recettes et des dépenses.

Aucune modification n'a été apportée aux rubriques portant sur les recettes, mais les "impôts" sont maintenant divisés en cinq groupes: "impôts sur le revenu", "impôts fonciers et impôts connexes", "taxes à la consommation", "cotisations aux régimes d'assurance-maladie et d'assurance sociale" et "impôts divers". Cette structure est plus logique que la précédente où certaines fonctions de moindre importance semblaient occuper une place prépondérante.

Bien que les modifications effectuées au chapitre des dépenses soient plus nombreuses, la continuité des séries ne devrait pas être menacée, sauf dans un cas d'assez peu d'importance.

La fonction "bien-être social" s'appelle maintenant "services sociaux" et est restructurée en vue d'une meilleure clarté. On y trouve les sous-fonctions "sécurité sociale", "régimes concernant la population active", "allocations familiales", "prestations aux anciens combattants", "bien-être social", "crédits et dégrèvements d'impôt" et "autres services de bien-être social".

Comme il est de plus en plus difficile de distinguer les dépenses affectées à la conservation de celles destinées au développement, les fonctions "ressources naturelles" et "agriculture, commerce et industrie, et tourisme" ont été groupées pour former la fonction "conservation des ressources naturelles et développement de l'industrie". Toutes les sous-fonctions des deux anciennes fonctions font maintenant partie de la nouvelle.

La fonction "surveillance et mise en valeur des régions" est maintenant appelée, de façon plus appropriée, "planification et aménagement des régions". Le concept général n'est pas modifié, mais quatre sous-fonctions sont maintenant définies: "urbanisme et zonage", "aménagement des agglomérations urbaines", "aménagement des régions" et "autres".

La sous-fonction "services de réglementation" a été redéfinie et s'intitule maintenant "mesures de réglementation".

Previously, all expenditures related to regulatory activities were assigned to this classification. Such assignment, however, is now recognized to conflict with one of the basic principles of the System under which an expenditure is classified in terms of the service thereby provided. As a consequence, where the purpose of a particular regulation or regulatory program is to protect or foster a particular activity or industry, expenditures on the regulation or program are now classified under the same function as the related activity or industry.

Review of the 1978-79 Fiscal Year

Revenue and Expenditures

Final data on the revenue and expenditure in 1978-79 of the provincial and territorial governments indicate that the moderation in the year-over-year growth of both categories noted for 1977-78 was maintained in the following year. At \$49.6 billion, gross general revenue increased 13.5% over 1977-78 revenue which, in turn, was 13.6% higher than that for 1976-77. The annual average for the period 1970-71 to 1977-78 inclusive was 16.5%. Gross general expenditure at \$48.6 billion was 11.4% higher than in 1977-78. The comparable increase for the latter year over 1976-77 was 11.8% and the annual average for 1970-71 to 1977-78 was 16.6%.

Among individual revenue sources the most noteworthy event was the decline of 3.8% from 1977-78 in consumption tax revenue as a consequence of the general sales tax reductions which were in effect for part of the year. Corporation income taxes, however, were 20.8% above the yield of the previous year and significantly ahead of the long term average annual growth of 15.6%. Inauguration of the Régie de l'assurance automobile du Québec resulted in a 40% increase in privileges, licenses and permits over similar revenue in the previous year. The 36.6% increase in sales of goods and services resulted mainly from transactions in Ontario - the sales of assets of the Ontario Student Housing Corporation to the Ontario Housing Corporation, of certain water and sewage installations to municipalities and of the provincial investment in Syncrude.

As in the previous year only debt charges (up 22.8% over 1977-78) among major expenditure functions showed a significantly higher rate of increase than the average for the period 1970-1977. Indeed, the increases over the previous year for social services (10.9%), health (9.7%) and education (5.7%) were noticeable less than their respective long term averages of 21.6%, 15.0% and 14.2%.

Auparavant, toutes les dépenses affectées aux activités de réglementation figuraient sous cette rubrique. Toutefois, on a constaté que cette façon de procéder dérogeait à l'un des principes fondamentaux du système voulant qu'une dépense soit classée selon le service auquel elle est affectée. Par conséquent, lorsque l'objet d'un règlement ou d'un programme réglementaire en particulier est de protéger ou d'encourager une certaine activité ou une certaine industrie, les dépenses consacrées au règlement ou au programme sont classées sous la fonction représentant l'activité ou l'industrie concernées.

Analyse de l'année financière 1978-79

Recettes et dépenses

D'après les données finales sur les recettes et les dépenses des administrations publiques provinciales et territoriales en 1978-79, la croissance modérée que ces deux catégories avaient connue en 1977-78 par rapport à l'exercice précédent s'est maintenue au cours de l'exercice suivant. Les recettes générales brutes se chiffrent à \$49.6 milliards et augmentent de 13.5% comparativement aux recettes de 1977-78, qui s'étaient elles-mêmes accrues de 13.6% par rapport à 1976-77. La hausse annuelle moyenne durant la période allant de 1970-71 à 1977-78 inclusivement s'établit à 16.5%. Les dépenses générales brutes s'élèvent à \$48.6 milliards et progressent de 11.4% par rapport à 1977-78. L'augmentation correspondante au cours de ce dernier exercice comparativement à 1976-77 était de 11.8%, et la moyenne annuelle de 1970-71 à 1977-78, de 16.6%.

En ce qui concerne les sources des recettes, le fait marquant a été la diminution de 3.8% des recettes provenant des taxes à la consommation par rapport à 1977-78. Cette baisse est attribuable aux réductions générales de la taxe de vente en vigueur pendant une partie de l'année. Le produit de l'impôt sur le revenu des sociétés accuse un bond de 20.8% par rapport à l'exercice antérieur et dépasse sensiblement la moyenne annuelle à long terme (15.6%). L'instauration de la Régie de l'assurance automobile du Québec se traduit par une majoration de 40% des privilèges, droits et permis comparativement à l'exercice précédent. La progression de 36.6% des ventes de biens et de services résulte principalement de transactions en Ontario, à savoir la vente de l'actif de la Ontario Student Housing Corporation à la Ontario Housing Corporation, de canalisations et de systèmes d'égout à des municipalités et des placements provinciaux dans Syncrude.

Comme pendant l'exercice précédent, le service de la dette, en hausse de 22.8%, est la seule fonction de dépense importante à marquer une nette progression par rapport à la moyenne de la période 1970-1977. En effet, les augmentations des dépenses en services sociaux (10.9%), des dépenses de santé (9.7%) et d'éducation (5.7%) ont été sensiblement inférieures à leurs moyennes à long terme de 21.6%, 15.0% et 14.2% respectivement.

Among individual provinces Alberta, which recorded an increase in revenue of 25.8% over 1977-78, again was far above the national average of 13.4%. The lowest year over-year growth - 7.8% - occurred in Manitoba which also recorded a decline of 3.5% in expenditure due to a change in year end for the Manitoba Health Services Commission and a reduction in capital expenditures. Newfoundland, which had an above average growth in revenue of 17.7%, recorded the largest percentage growth in expenditure - 32.5%. This resulted primarily from the loss on disposal of Labrador Linerboard Limited.

Text Table I illustrates revenue sources as percentages of gross general revenue of each government in 1978-79 while Text Table III shows the year-to-year changes of the main sources from 1977-78 to 1978-79.

Text Table II depicts 1978-79 expenditure functions for each government as percentages of gross general expenditure for that year while Text Table IV shows the changes in the outlays on the main expenditure functions between 1977-78 to 1978-79.

Québec Pension Board

The data in this report for the province of Québec includes the revenues and expenditures of the Québec Pension Board, established by the province in 1965. (See Text Table V).

The only transactions, included at the provincial level (except Québec) as universal pension plans expenditures, are the contributions of provincial governments as employers to the Canada Pension Board. Being a federal agency, the revenues and expenditures are included in the federal government universe.

Text Table VI shows the position of the province of Québec in the case where the Québec Pension Board would have been considered a sub-sector of the provincial government universe instead of part of the universe.

Inter-Provincial Comparability

The "gross general" concept of revenue and expenditure as applied in this publication provides a measure of inter-provincial comparability but only at the general government level. Because of the varying importance of provincial government enterprises in the activities of the provincial public sub-sector in the ten provinces and the two territories and, even more, because of the divergences in the allocation of responsibilities between provincial and local governments among the provinces, complete comparability can

Quant aux provinces, l'Alberta, dont les recelles affichent une hausse de 25.8% par rapport à 1977-78, se situe bien au-delà de la moyenne nationale de 13.4%. La croissance la plus faible (7.8%) s'observe au Manitoba, dont les dépenses ont baissé de 3.5% en raison de modifications de fin d'exercice apportées à la Manitoba Health Services Commission et d'une diminution des dépenses d'investissement. Terre-Neuve, dont les recettes enregistrent une hausse (17.7%) supérieure à la moyenne, accuse la plus forte augmentation en pourcentage des dépenses, soit 32.5%, qui s'explique principalement par les pertes subies lors de la vente de Labrador Linerboard Limited.

Le tableau explicatif I présente les sources de revenu de chaque administration en 1978-79 en pourcentage de ses recettes générales brutes, tandis que le tableau explicatif III fait ressortir l'évolution des principales sources de revenu entre 1977-78 et 1978-79.

Le tableau explicatif II présente les fonctions de dépense de chaque administration en 1978-79 en pourcentage des dépenses générales brutes, tandis que l'évolution des principales fonctions de dépense entre 1977-78 et 1978-79 est exposée au tableau explicatif IV.

Régie des rentes du Québec

Les données de la province de Québec figurant dans la présente publication comprennent les recettes et des dépenses de la Régie des rentes du Québec, organisme créé par la province en 1965. (Voir le tableau explicatif V).

Les seules transactions incluses au niveau provincial (sauf Québec) comme dépenses pour les régimes universaux de rentes, sont les contributions des gouvernements provinciaux à titre d'employeur au Régime de pension du Canada. Étant un organisme fédéral, les recettes et les dépenses sont inclus dans l'univers gouvernemental fédéral.

Le tableau explicatif VI présente la position de la province de Québec dans le cas où la Régie des rentes du Québec serait considérée comme une sous-section de l'univers gouvernemental provincial plutôt que partie intégrante de l'univers.

Comparabilité interprovinciale

Le concept des recettes et des dépenses "générales brutes" tel qu'il s'applique ici fournit une mesure de la comparabilité inter-provinciale, mais au niveau de l'univers gouvernemental seulement. Étant donné que l'importance des entreprises publiques provinciales dans les activités du sous-secteur public provincial des dix provinces et des deux territoires varie, et plus encore par suite des divergences dans l'attribution des responsabilités entre les gouvernements provinciaux et les administrations locales d'une province à l'autre, on ne peut obtenir une comparabilité parfaite que lorsque les

only be achieved when provincial government and provincial enterprise operations are integrated and provincial and local government transactions are consolidated. This consolidation of the revenues and expenditures of the provincial and local government levels into a combined provincial-local statistical universe is presented in the Statistics Canada publication *Consolidated Government Finance* (Catalogue 68-202) in which the inter-level transactions are eliminated.

Explanatory Comments

Tables 1 and 2 Gross General Revenue and Expenditure

These tables include the current and capital revenue and expenditure transactions of the provincial government universe.

In order to achieve a measure of inter-provincial comparability, certain adjustments have been made to the figures shown in the provincial accounts. Reconciliations of "gross general" revenue and expenditure with provincial accounts are found in Tables 3 and 4. The adjustments are explained more fully in the commentary to those tables.

Text Table VII indicates the detail of the "Miscellaneous taxes — other" item on Table 1.

Tables 3 and 4 Reconciliation of Gross General Revenue and Expenditure with Provincial Accounts

These tables are included to explain the difference between current and capital revenue and expenditure as presented in provincial and territorial accounts, and gross general revenue and expenditure as compiled for the financial management series.

The revenues and expenditures of the special funds are accounted for separately and are not included in provincial or territorial revenues and expenditures despite the fact that the agencies in question perform functions that are really of a governmental nature. For purposes of establishing gross general revenue and expenditure, the transactions of these funds are added to budgetary transactions.

Because of variations in the extent to which provincial and territorial governments deduct amounts from revenue and expenditure in their financial statements, adjustments also are made in the series to reverse all of these deductions and to arrive at "gross" revenue and expenditure.

opérations des gouvernements provinciaux et de leurs entreprises sont intégrées et lorsque les transactions publiques provinciales et locales sont consolidées. Cette consolidation des recettes et des dépenses publiques provinciales et locales en un univers statistique combiné provincial-local, est exposé dans la publication de Statistique Canada intitulée *Les Finances Publiques Consolidées* (numéro 68-202 au catalogue), et dans laquelle les opérations entre divers niveaux sont éliminées.

Commentaires explicatifs

Tableaux 1 et 2 Recettes et dépenses générales brutes

Ces tableaux comprennent les recettes et les dépenses ordinaires et de nature capitale de l'univers des gouvernements provinciaux.

Dans un souci de comparabilité interprovinciale, on a apporté certains ajustements aux chiffres figurant dans les comptes provinciaux. Les rapprochements des recettes et des dépenses "générales brutes" des comptes provinciaux se trouvent aux tableaux 3 et 4. Les ajustements sont expliqués plus en détail dans les commentaires de ces tableaux.

Le tableau explicatif VII donne le détail du poste "Diverses impositions — autres" du tableau 1.

Tableaux 3 et 4 Rapprochement des recettes et des dépenses générales brutes avec celles des comptes provinciaux

On a inclus ces tableaux pour expliquer la différence entre les recettes et les dépenses ordinaires et de nature capitale tels qu'ils figurent dans les comptes des provinces et des territoires, et les recettes et dépenses générales brutes établis pour les séries de la gestion financière.

Les recettes et les dépenses des fonds spéciaux sont comptabilisés séparément et ne sont pas pris en compte dans les recettes et les dépenses des gouvernements provinciaux ou territoriaux en dépit du fait que les activités des organismes en question sont réellement de nature gouvernementale. Pour établir les recettes et les dépenses générales brutes, on ajoute les opérations de ces fonds aux opérations budgétaires.

Les sommes que les gouvernements provinciaux et territoriaux déduisent dans leurs états financiers des recettes et des dépenses pouvant varier, on apporte également des ajustements aux séries pour annuler toutes ces déductions et obtenir les recettes et les dépenses "brutes".

The trading operations of liquor boards are treated in the financial management series as enterprises and only their remitted trading profits are included in provincial or territorial revenues. In some provinces, however, liquor boards also carry out regulatory or control functions and derive revenue from these activities. This revenue, generally in the form of licences and permits, and the related expenditure are considered to be general government revenue and expenditure. Therefore, they represent an adjustment to the revenue and expenditure presented in the provincial government financial statements.

A uniform approach to the treatment of working capital funds in the financial management series results in adjustments to both revenue and expenditure. This compensates for the different presentation of such funds in the provincial and territorial accounts.

An attempt is also made to apply a consistent approach to recoveries of expenditure and refunds of revenue. A number of items regarded by the provinces as revenue or expenditure are considered to represent recoveries of current and prior year expenditures or refunds of current year revenues. Consequently they are excluded from gross general revenue and expenditure.

Non-revenue and surplus receipts and non-expenditure and surplus payments represent items which are not regarded as provincial government revenue and expenditure transactions in this series. They also include such items as repayments of loans and advances, revenues collected on behalf of other jurisdictions, purchases and sales of investments, loans and advances and other surplus account transactions.

The deduction of intragovernment transactions represents the elimination of transactions among the component parts of the general government statistical universe for each province. Departmental expenditures included in the revenues of special funds and vice-versa, revenues of one special fund treated as expenditure in another special fund, and transfers of funds between departments would all result in the duplication of revenue and expenditure when these entities are combined to form the statistical universe for any particular province. It, therefore, becomes necessary to identify and eliminate these interfund or intra universe transactions.

Table 5 Economic Classification of Gross General Revenue

This table classified the gross general revenue of the financial management series by economic sources.

Les activités commerciales des régies des alcools sont considérées dans les séries de la gestion financière comme des entreprises publiques et seuls leurs profits d'exploitation remis figurent dans les recettes provinciales ou territoriales. Cependant, dans certaines provinces, les régies des alcools ont également des fonctions réglementaires ou de contrôle d'où elles tirent des recettes. Ces dernières, généralement sous la forme de droits et de permis, ainsi que les dépenses correspondantes, sont considérées comme des recettes et des dépenses de l'univers gouvernemental et constituent donc un ajustement aux recettes et aux dépenses figurant dans les états financiers des gouvernements provinciaux.

Une approche uniforme dans le cas des fonds de roulement dans les séries de la gestion financière a donné lieu à des ajustements aux recettes et aux dépenses pour compenser la différence de présentation de ces fonds dans les comptes provinciaux et territoriaux.

On essaie également d'utiliser une approche homogène dans le cas des recouvrements de dépenses et des remboursements de recettes. Un certain nombre de postes considérés par les provinces comme des recettes ou des dépenses sont considérés comme des recouvrements des dépenses de l'année courante ou comme des remboursements des recettes de l'année courante, et sont de ce fait exclus des recettes et des dépenses générales brutes.

Les entrées de fonds qui ne sont pas des recettes et les entrées au titre de l'excédent, ainsi que les paiements qui ne sont pas des dépenses et ceux qui sont prélevés sur l'excédent, constituent les postes qui ne sont pas considérés comme des recettes et des dépenses des gouvernements provinciaux dans cette série; elles comprennent notamment les remboursements l'emprunts et d'avances, les recettes recueillis pour le compte d'autre autorités, les achats et les ventes de placements, les prêts et avances et les autres opérations au titre du compte de l'excédent.

La déduction des transactions entre les composantes du gouvernement consiste à éliminer les opérations entre les éléments constitutifs de l'univers statistique gouvernemental de chaque province. Les dépenses d'un ministère comprises dans les recettes d'un fonds spécial et inversement, les recettes d'un fonds spécial considérés comme dépenses dans un autre fonds spécial, les transferts de fonds entre les ministères; tous ces éléments amèneraient un double comptage des recettes et des dépenses lorsque l'on regroupe ces entités pour former l'univers statistique d'une province donnée. Il devient donc nécessaire d'isoler et d'éliminer ces opérations entre fonds ou à l'intérieur de l'univers.

Tableau 5 Classification économique des recettes générales brutes

Ce tableau classe les recettes générales brutes des séries de la gestion financière selon les sources économiques Les sour-

The sources of government revenue for economic purposes are direct taxes on persons and business, indirect taxes, other current transfers from persons, transfers from other levels of government, investment income and other.

Direct taxes. Direct taxes include personal and corporation income taxes, payroll tax, succession duties and the levies imposed on logging and mining profits. Employee contributions to non-trusteed pension plans, contributions to the Québec Pension Board and Workmen's Compensation Board assessments are also considered as direct taxes — persons.

Indirect taxes. Indirect taxes encompass sales taxes, motor fuel taxes, insurance premiums, capital and place of business taxes, amusement taxes and real and personal property taxes. Privileges, licences and permits purchased by business entities such as motor vehicles licences, natural resource exploration permits, etc., are also regarded as indirect taxes.

Other Current Transfers from Persons. Transfers from persons consist of health insurance premiums, personal motor vehicle permits and licences, and other licences and permits such as fishing, hunting and marriage licences. Fines and penalties also fall into this economic category.

Transfers from Other Levels of Government. This category includes both general and specific purpose transfers from federal and local governments. The provincial share of federal estate tax, the tax on undistributed income and income tax on privately owned public utilities are classified as transfer payments at the provincial government level.

Investment income. Interest, dividends and profits on foreign exchange, royalties and the remitted profits of government enterprises as well as liquor boards are included under this economic classification.

Other revenue. For example, sales of goods and services sales of land and fixed assets and other revenue items are not regarded as adding to production in the economic sense.

Table 6 Economic Classification of Gross General Expenditure

The objects of expenditure used in the economic classification are purchases of goods and services and

ces des recettes publiques aux fins économiques sont les impôts directs des particuliers et des entreprises, les impôts indirects, les autres transferts courants des particuliers, les transferts d'autres niveaux d'administration publique, les revenus de placements et autres.

Impôts directs. Les impôts directs comprennent les impôts sur le revenu des particuliers et des corporations, l'impôt sur la feuille de paie, les droits successoraux et les droits imposés sur les bénéfices forestiers et miniers. Les cotisations des employés aux régimes de pension gérés par le gouvernement, les cotisations au Régime des rentes du Québec et les versements à la Caisse d'indemnisation des accidents du travail sont également considérés comme des impôts directs.

Impôts indirects. Les impôts indirects comprennent les taxes de vente, les taxes sur les carburants, les taxes sur le revenu de primes des compagnies d'assurance, les taxes sur le capital et les taxes d'affaires, les taxes sur les spectacles ainsi que les impôts sur la propriété foncière et personnelle. Les privilèges, droits et permis achetés par les entités commerciales, tels que les permis pour véhicules automobiles, les permis portant sur l'exploitation des ressources naturelles, etc., sont également considérés comme des impôts indirects.

Autres transferts courants des particuliers. Les transferts des particuliers comprennent les primes personnelles pour véhicules automobiles et les droits et autres permis tels que les permis de pêche, de chasse et de mariage. Les amendes et pénalités entrent également dans cette catégorie économique.

Transferts d'autres niveaux d'administration publique. Cette catégorie comprend les transferts à des fins générales et à des fins spécifiques du gouvernement fédéral et des administrations locales. La part provinciale de l'impôt fédéral sur les biens transmis par décès, l'impôt sur le revenu non distribué des sociétés et l'impôt sur le revenu des services privés d'utilité publique sont classés comme des transferts au niveau du gouvernement provincial.

Revenus de placements. Les intérêts, dividendes et le profit sur le change étranger, les redevances et les bénéfices déclarés des entreprises publiques ainsi que les régies des alcools figurent sous cette rubrique.

Autres recettes. Par exemple, les ventes de biens et de services les ventes de terrains et d'immobilisations ainsi que d'autres éléments de revenu dont on ne considère pas, au sens économique, qu'ils contribuent à la production.

Tableau 6 Classification économique des dépenses générales brutes

Les articles de dépenses utilisés dans la classification économique sont les achats de biens et de services et les

transfer payments to persons, business and other levels of government.

Purchases of Goods and Services This classification includes all current expenditures of government on such salaries and wages, materials and supplies, travelling expenses, professional services, purchases of land, write-offs of bad debts and other final expenditures. For purposes of this publication, transfer payments to public hospitals are also treated as purchases of goods and services.

Transfers to Persons. Transfers to persons consist of payments to individuals and non-profit institutions for which no direct service is rendered by the recipients. Included in this latter group are universities, other post-secondary educational facilities and private non-commercial organizations and associations. For purposes of this publication, interest on the public debt is also treated as a transfer to persons.

Transfers to Business. This category includes both subsidies for current operations and capital assistance payments made to business. Subsidies for current operations represent payments designed to make it possible for producers to stabilize or lower prices while capital assistance covers grants made to commercial enterprises to assist in the acquisition of new facilities or machinery and equipment. Home-owners' subsidies paid by provincial governments in Saskatchewan, Alberta and British Columbia are also included in transfers to business.

Transfers to Other Levels of Government. Transfers to other levels of government consist of grants to local governments. The term "local government" refers to municipalities, local school boards and other municipally organized bodies such as conservation authorities.

Table 7 Historical Summary of Gross General Revenue and Expenditure

This table presents actual data for four years, estimated data for a year on gross general revenue by source and gross general expenditure by function for each province and territory. Data are also presented

paiements de transfert aux particuliers, aux entreprises et à d'autres niveaux d'administration publique.

Achats de biens et de services. Sous cette catégorie figurent toutes les dépenses ordinaires des gouvernements pour des postes tels que les traitements et salaires, les matières et les fournitures, les dépenses de voyage, les services professionnels les achats de terrain, l'amortissement des créances douteuses et autres dépenses finales. Dans la présente publication les transferts aux hôpitaux publics sont également considérés comme des achats de biens et services.

Transferts aux particuliers. Les transferts aux particuliers consistent en paiements aux particuliers et aux institutions sans but lucratif et en échange desquels les bénéficiaires ne rendent aucun service direct. Dans cette catégorie se trouvent les universités, les autres établissements d'enseignement post-secondaire ainsi que les organismes et associations privés non commerciaux. Dans la présente publication, l'intérêt sur la dette publique est également considéré comme un transfert à des particuliers.

Transferts aux entreprises. Sous cette rubrique entrent les subventions au titre des opérations ordinaires et les paiements sous forme de subventions pour fins d'immobilisation versés aux entreprises. Les subventions au titre des opérations ordinaires représentent des paiements destinés à permettre aux producteurs de stabiliser ou d'abaisser leurs prix, cependant que les subventions pour fins d'immobilisation portent sur des transferts consentis aux entreprises commerciales pour les aider à acquérir de nouvelles installations ou des machines et du matériel. Les subventions aux propriétaires de maisons payées par les gouvernements de la Saskatchewan, de l'Alberta et de la Colombie-Britannique font également partie des transferts aux entreprises.

Transferts à d'autres niveaux d'administration publique. Les transferts à d'autres niveaux d'administration publique comprennent les allocations aux administrations publiques locales. Par "administration publique locale", on entend les municipalités, les conseils scolaires locaux et autres formations organisées en municipalités, comme par exemple les offices de conservation.

Tableau 7 Sommaire chronologique des recettes et des dépenses générales brutes

Ce tableau regroupe les données réelles pour quatre années et les données estimatives pour une années en ce qui concerne les recettes générales brutes par source et les dépenses générales brutes par fonction, par province et par territoire et

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
 - nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- † revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

Because of rounding, totals and sub-totals for statistical tables may differ slightly from the sum of their component parts.

The reader is cautioned that data for fiscal years prior to the 1970 issue of this publication are not comparable because of changes in coverage. To assist users, the Public Finance Division has undertaken to provide the principal items of information required to adjust data for the years 1965 to 1969 to the new basis. This information may be obtained upon request from the Public Finance Division, Statistics Canada, Ottawa.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
 - néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- † nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTA

À cause de l'arrondissement des chiffres, les totaux et sous-totaux ne correspondent pas toujours à l'addition de leurs composants.

Le lecteur est averti que les données de cette publication pour les années fiscales précédentes à 1970 ne sont pas directement comparable par suite des changements apportés à la couverture statistique. Pour venir en aide aux utilisateurs, la Division des finances publiques a entrepris de fournir les principales informations nécessaires à l'ajustement sur la nouvelle base des données pour les années 1965 à 1969. Ces informations sont disponibles sur demande auprès de la Division des finances publiques, Statistique Canada, Ottawa.

Introduction

This publication presents the revenues and expenditures of the governments of each of the Canadian provinces and territories in the form of government financial management statistics. The primary objective of the publication is to meet the needs of users of financial information pertaining to the activities of these governments by converting the idiosyncratic data produced by each government into standardized statistics which are compatible as between these governments (and also with those of other levels of government produced by the Public Finance Division of Statistics Canada) and are consistent from one reference period to another.

The Financial Management Statistics System

The concepts and classifications underlying this statistical system are described in detail in the publication "The Canadian System of Government Financial Management Statistics" (Catalogue (68-506). Canadian governments at all three levels — federal, provincial and local — display much the same organizational structure — a legislature to which is subordinated a central core of departments to which, in turn, are attached numbers of agencies with varying degrees of autonomy. However, this general similarity of structure disappears when a detailed examination is made. Similarly-named entities perform quite different roles in different governments; services provided by a department in one government are provided by an agency in a second and are not provided at all in a third; and, while most agencies provide "government-type" services, others provide goods or services which in other jurisdiction could be, and often are, provided by non government commercial entities. Furthermore, since most government finance reports are designed to show administrative accountability and hence are closely related to organizational structures, the raw data contained in these reports are practically useless for any study which seeks to relate the financial activities of one government to those of another.

The Canadian System of Government Financial Management Statistics seeks to overcome the lack of homogeneity in raw government financial information at the provincial/territorial level in the following ways:

Introduction

Cette publication présente les recettes et dépenses publiques de chaque province ou territoire du Canada sous forme de statistiques de la gestion financière des gouvernements. Elle vise d'abord à répondre aux besoins des utilisateurs en renseignements financiers relatifs aux activités de ces gouvernements en transformant les données particulières produites par chacun en statistiques normalisées pour les divers gouvernements (compatibles avec celles produites par la Division des finances publiques de Statistique Canada sur d'autres niveaux de gouvernement) et comparables d'une période de référence à une autre.

Système statistique de la gestion financière

Les concepts et classifications qui sous-tendent ce système statistique sont décrits en détail dans la publication "Le système canadien des statistiques de la gestion financière" (no 68-506 au catalogue). Les trois paliers de gouvernement au Canada — fédéral, provincial et local — se ressemblent beaucoup; ils comprennent une assemblée législative dont relève un groupe central de ministères ou services auxquels se rattachent une grande quantité d'organismes jouissant de divers degrés d'autonomie. Cependant, cette similitude de structure ne soutient pas un examen détaillé. Des ministères ou services ayant des noms semblables diffèrent sensiblement dans le cas de certains gouvernements; certains services fournis par un ministère dans une province le sont par un organisme dans une autre et ne le sont pas dans une troisième; de plus, bien que la plupart des organismes assurent des services "publics", d'autres organismes fournissent des biens ou services qui, ailleurs, pourraient être fournis, et le sont souvent, par l'entreprise privée. Comme la plupart des rapports financiers des gouvernements font état de la responsabilité administrative et, par conséquent, suivent de près la structure de l'organisation, les données qu'ils renferment sont presque inutiles pour toute étude visant à comparer les activités financières de divers gouvernements.

Le système canadien des statistiques de la gestion financière cherche à corriger le manque d'homogénéité entre les renseignements financiers fournis par les diverses provinces ou territoires par les moyens suivants:

The government universe is divided in two parts — general government and government enterprises. The general government consists of:

Departments of government;

special funds (see “Appendix” for the list of special funds included in this report):

administrative and regulatory funds which perform functions similar to those of government departments;

agencies engaged in “industrial” or “commercial” activities, primarily to service the requirements of their own governments;

agencies engaged primarily in the channelling of funds from one level of government to another or among organizations at the same level of government, e.g., bodies established by provincial legislation to help finance the capital programs of municipalities and school boards;

Workers’ Compensation Boards;

government-owned institutions such as those engaged in education, health and welfare services or administration of justice, e.g. agricultural schools, residences for handicapped persons, gaols, etc.;

Quebec Pension Plan;

non-trusteed public service pension plans because their funds constitute an integral part of the consolidated revenue fund or which are otherwise available to the government in the financing of its operations;

working capital funds.

All entities classified to general government are consolidated into a single statistical unit for each government.

Revenues of each unit are classified by source and expenditures by function or purpose, while assets and liabilities conform with normal accounting classifications.

A government enterprise is an organized entity, usually corporate, established by a government to produce goods or services for sale on the open market at prices related to costs (this relationship being ascertainable from its own independent system of accounts), which has relatively autonomous management of its affairs and is staffed by other than public servants, though certain staff benefit schemes, e.g., superannuation, may be integrated with those of the public service of the parent government. The enterprises are classified by parent government and by Standard Industrial Classification. Financial statistical classifications for enterprises generally accord with those of commercial accounting.

L’univers est subdivisé en deux parties: l’univers gouvernemental et celui des entreprises publiques. L’univers gouvernemental comprend:

les ministères;

les fonds spéciaux (voir “la liste” des fonds spéciaux en annexe):

fonds administratifs et réglementaires dont les fonctions sont semblables à celles des ministères;

organismes ayant une activité “industrielle” ou “commerciale” pour répondre avant tout aux besoins des gouvernements dont ils relèvent;

organismes dont l’activité principale est l’acheminement de fonds d’un échelon de gouvernement à un autre ou entre des organismes d’un même échelon, comme ceux créés par des lois provinciales pour aider au financement des investissements des municipalités et des conseils scolaires;

commissions des accidents du travail;

les établissements appartenant à des gouvernements comme ceux qui s’occupent de l’éducation, de la santé et du bien-être social, ou de l’administration de la justice. Dans cette catégorie, entrent les écoles d’agriculture, les résidences pour personnes handicapées, les prisons, etc.

Le régime des rentes du Québec;

les régimes de pensions de la Fonction publique non constitués en fiducie parce que leurs fonds forment une partie intégrante du fonds consolidé du revenu ou sont de toute autre manière à la disposition du gouvernement pour le financement de ses activités;

les fonds de roulement.

Toutes les entités classées dans l’univers gouvernemental sont groupées en une seule unité statistique pour chaque gouvernement.

Les recettes de chaque unité sont classés par source et les dépenses par fonction ou but, tandis que les éléments d’actif et de passif suivent les classifications comptables normales.

Une entreprise publique est une personne morale, habituellement une société, créée par un gouvernement pour produire des biens ou services en vue de leur vente sur le marché libre à des prix établis en fonction des coûts (cela peut être vérifié à partir de son propre système indépendant de comptes), qui gère ses propres affaires de façon relativement autonome et dont le personnel n’est pas constitué de fonctionnaires, bien que certains avantages sociaux, comme la pension de retraite, puissent être intégrés à ceux du gouvernement dont elle relève. Les entreprises sont classées selon le gouvernement dont elles relèvent et les catégories de la Classification des activités économiques. La statistique financière des entreprises correspond généralement à la comptabilité commerciale.

While the foregoing outlines the bases on which the financial management system rests, the reader is urged to refer to the descriptive publication mentioned above to obtain the more detailed knowledge which is a prerequisite for the full comprehension and use of the statistics produced in accordance with this system. The full range of these statistical series is listed on the rear cover of the present publication.

The National Accounts Statistical System

A second national standardized system for the production of financial statistics of Canadian governments is contained in the framework of the Canadian System of National Accounts. While the financial management system depicts the expenditures made by government to discharge its functions, the relative importance of the different types of revenue raised to defray these expenditures, the means used to finance the deficit between revenue and expenditure or to dispose of any surplus of revenue over expenditure and the resulting financial situation of government; the economic analysis system is concerned with the economic effects of government activity. Although there are significant differences between the two systems in concepts and, particularly, in classifications, it is possible, as is shown in this publication, to cross-classify government financial data in economic terms. But, just as the resulting financial management statistics differ significantly from the estimates or public accounts from which they are derived, so the economic analysis statistics differ from the national income and expenditure accounts.

Coverage, Sources and Validity

The present publication covers the general government universe of each province and territory on an all-inclusive basis except for certain institutions for which complete financial reports are unavailable. These institutions are incorporated only to the extent of their financial transactions with their present governments; certain very minor revenues which these institutions obtain from other sources are omitted from the publication as are detailed analyses of their expenditures.

The financial statistics in this publication are derived from information contained in the public accounts of the governments and from the audited financial statements of their agencies. Additional detail is obtained in a few instances from correspondence with provincial and territorial authorities. The co-operation of provincial and territorial government officials is gratefully acknowledged.

The main tables in this publication have been reviewed by officials of the governments to which the data relates but final responsibility for the validity of the statistics remains with the Provincial Government Section of the Public Finance Division of Statistics Canada.

Même si nous venons d'esquisser les bases du système de gestion financière, nous prions le lecteur de se reporter à la publication mentionnée plus haut afin de mieux connaître ces bases, une condition essentielle à la parfaite compréhension et à l'utilisation des statistiques produites conformément à ce système. Vous trouverez la liste complète de ces séries statistiques sur la partie arrière de la couverture de cette publication.

Système statistique des comptes nationaux

Le système canadien de la comptabilité nationale est un deuxième système national normalisé pour la statistique financière des gouvernements canadiens. Alors que le système de la gestion financière présente les dépenses effectuées par les gouvernements pour s'acquitter de leurs fonctions, l'importance relative des différentes sources de recettes perçues pour assumer ces dépenses, les moyens utilisés pour financer le manque de recettes par rapport aux dépenses ou pour disposer l'excédent des recettes sur les dépenses et la situation financière finale des gouvernements; le système d'analyse économique s'intéresse, pour sa part, aux incidences économiques de leurs activités. En dépit de différences conceptuelles sensibles entre les deux systèmes, principalement dans les classifications, il est possible, comme le démontre cette publication, de recouper les données financières en termes économiques. Mais, tout comme les statistiques sur la gestion financière diffèrent considérablement des budgets ou des comptes publics dont elles sont dérivées, les résultats de l'analyse économique sont différents de ceux des comptes nationaux des recettes et dépenses.

Champ d'observation, sources et validité

La présente publication englobe toutes les activités gouvernementales de chaque province ou territoire, sauf certaines institutions pour lesquelles il n'existe pas de rapports financiers complets. Nous n'avons tenu compte de ces institutions que pour leurs transactions financières avec le gouvernement dont elles relèvent; cette publication ne prend pas en compte certaines recettes très faibles provenant d'autres sources et n'analyse pas leurs dépenses en détail.

Les statistiques financières de cette publication sont tirées de renseignements contenus dans les comptes publics des gouvernements et dans les états financiers vérifiés des organismes qui en dépendent. Dans quelques cas, des détails supplémentaires ont été obtenus directement des autorités provinciales ou territoriales. Nous remercions les fonctionnaires des provinces et territoires de la collaboration qu'ils nous ont accordée.

Les principaux tableaux de cette publication ont été vérifiés par les fonctionnaires compétents des gouvernements, mais c'est la Section des administrations provinciales, Division des finances publiques, Statistique Canada, qui a la responsabilité définitive des statistiques.

Revision of the Financial Management Statistics System

The most recent publication describing the Financial Management Statistics System (Catalogue 68-506) was issued in September 1972; amendments were issued in April 1974. Public Finance Division commenced a review of the System in 1979 and expects to issue a revised publication later in 1981. While this review has concentrated on strengthening the conceptual framework of the System, developments in government operations in the decade now ended together with changes in user requirements have necessitated some modifications to the revenue and expenditure classifications.

While no changes have been made to individual revenue classifications, "Taxes" have been re-aligned into five groups — "Income Taxes", "Property and Related Taxes", "Consumption Taxes", "Health and Social Insurance Levies", and "Miscellaneous". This arrangement is more logical than that previously employed which appeared to give undue prominence to certain relatively minor categories.

While the changes made to expenditure classifications are more noticeable they should not affect the continuity of the series except in one relatively minor instance.

The function "Social Welfare" has been renamed "Social Services" and re-structured to provide greater clarity. It now comprises the sub-functions "Social Security", "Labour Force Plans", "Family Allowances", "Veterans Benefits", "Social Welfare", "Tax Credits and Rebates", and "Other Social Services".

Because it has become increasingly difficult to distinguish between expenditures related to conservation and those aimed at development, the two functions, "Natural Resources" and "Agriculture, Trade and Industry, and Tourism", have been combined into a single function, "Resource Conservation and Industrial Development". All the sub-functions of both former functions are allocated to the new function.

The function "Supervision and Development of Regions" has been re-named more appropriately "Regional Planning and Development". While the overall concept remains unchanged, four sub-functions — "Planning and Zoning", "Community Development", "Regional Development" and "Other" — are also now identified.

Révision du Système des statistiques de la gestion financière

La dernière publication décrivant le Système des statistiques de la gestion financière (no 68-506 au catalogue) remonte à septembre 1972, bien que des modifications aient été apportées en avril 1974. La Division des finances publiques a entrepris une révision du système en 1979 et compte en publier une nouvelle version en 1981. Quoique cette révision vise surtout à donner plus de rigueur au cadre conceptuel du système, l'évolution des activités gouvernementales au cours de la dernière décennie, accompagnée des changements qu'ont connus les besoins des utilisateurs, a rendu nécessaire la modification de la structure des recettes et des dépenses.

Aucune modification n'a été apportée aux rubriques portant sur les recettes, mais les "impôts" sont maintenant divisés en cinq groupes: "impôts sur le revenu", "impôts fonciers et impôts connexes", "taxes à la consommation", "cotisations aux régimes d'assurance-maladie et d'assurance sociale" et "impôts divers". Cette structure est plus logique que la précédente où certaines fonctions de moindre importance semblaient occuper une place prépondérante.

Bien que les modifications effectuées au chapitre des dépenses soient plus nombreuses, la continuité des séries ne devrait pas être menacée, sauf dans un cas d'assez peu d'importance.

La fonction "bien-être social" s'appelle maintenant "services sociaux" et est restructurée en vue d'une meilleure clarté. On y trouve les sous-fonctions "sécurité sociale", "régimes concernant la population active", "allocations familiales", "prestations aux anciens combattants", "bien-être social", "crédits et dégrèvements d'impôt" et "autres services de bien-être social".

Comme il est de plus en plus difficile de distinguer les dépenses affectées à la conservation de celles destinées au développement, les fonctions "ressources naturelles" et "agriculture, commerce et industrie, et tourisme" ont été groupées pour former la fonction "conservation des ressources naturelles et développement de l'industrie". Toutes les sous-fonctions des deux anciennes fonctions font maintenant partie de la nouvelle.

La fonction "surveillance et mise en valeur des régions" est maintenant appelée, de façon plus appropriée, "planification et aménagement des régions". Le concept général n'est pas modifié, mais quatre sous-fonctions sont maintenant définies: "urbanisme et zonage", "aménagement des agglomérations urbaines", "aménagement des régions" et "autres".

The sub-function "Regulatory Services" has been re-defined and re-named "Regulatory Measures". Previously, all expenditures related to regulatory activities were assigned to this classification. Such assignment, however, is now recognized to conflict with one of the basic principles of the System under which an expenditure is classified in terms of the service thereby provided. As a consequence, where the purpose of a particular regulation or regulatory program is to protect or foster a particular activity or industry, expenditures on the regulation or program are now classified under the same function as the related activity or industry.

Review of the 1978-79 Fiscal Year

Revenue and Expenditures

The gross general revenue of all provincial and territorial governments was \$56.3 billion for the fiscal year ending March 31, 1980, an increase of 13.6% over the previous year. This increase is consistent with those recorded in 1978-79 (13.5%) and 1977-78 (13.6%). Gross general expenditures at \$55.2 billion represents an increase of 13.8% over the previous year, and a significantly higher growth rate than those recorded in 1978-79 (11.4%) and 1977-78 (11.8%).

Among individual revenue sources, natural resource revenue showed the highest increase (23.7%) due to higher revenues derived from Oil and Natural Gas (up 18%) and forestry (up 86.2%). Of equal significance is the growth in consumption taxes (20.7%) which was due primarily to the reinstatement of sales tax rates, following the general sales tax reduction which was in effect for part of 1978. Other significant increases also occurred with respect to return on investments (up 20.3%) and general purpose transfers from other levels of government (up 19.8%). These increases were partially offset by declines in sales of goods and services (down 11.6%) and other revenue (down 2.3%).

With the exception of regional planning and development (down 11.8%) the expenditures for all major functions increased. Among individual expenditure functions the most noteworthy event was the increase of 82.1% over the previous year in general purpose transfers to local government due almost exclusively to the implementation of the Municipal Debt Reduction Act in Alberta. This component was also influenced by the implementation of the Quebec reform of municipal taxation which led to a decline of 25.8% in transfers to local governments in the province of Quebec. There was a modest acceleration in growth rates for Health (up 11%), Social services (12.9%)

La sous-fonction "services de réglementation" a été redéfinie et s'intitule maintenant "mesures de réglementation". Auparavant, toutes les dépenses affectées aux activités de réglementation figuraient sous cette rubrique. Toutefois, on a constaté que cette façon de procéder dérogeait à l'un des principes fondamentaux du système voulant qu'une dépense soit classée selon le service auquel elle est affectée. Par conséquent, lorsque l'objet d'un règlement ou d'un programme réglementaire en particulier est de protéger ou d'encourager une certaine activité ou une certaine industrie, les dépenses consacrées au règlement ou au programme sont classées sous la fonction représentant l'activité ou l'industrie concernées.

Analyse de l'année financière 1978-79

Recettes et dépenses

Les recettes générales brutes des administrations publiques provinciales et territoriales pour l'année financière se terminent le 31 mars 1980, se chiffrent à 56.3 milliards; soit une augmentation de 13.6% par rapport à l'exercice antérieur. Cette augmentation est comparable aux augmentations inscrites pour 1978-79 (13.5%) et 1977-78 (13.6%). Les dépenses générales brutes se chiffrent à \$55.2 milliards, soit une hausse de 13.8% par rapport à l'exercice antérieur, et une croissance marquée par rapport aux années 1978-79 (11.4%) et 1977-78 (11.8%).

En ce qui concerne les sources des recettes, les recettes provenant des ressources naturelles ont marquées la plus forte augmentation (23.7%) à cause du pétrole et gaz naturel (en hausse de 18%) et des forêts (en hausse de 86.2%). Il est important aussi de signaler l'augmentation de 20.7% sur les taxes à la consommation. Cette augmentation est presque entièrement attribuable à la fin du programme de réduction de la taxe de vente (en vigueur pendant une partie de l'année 1978). Parmi les autres augmentations de recettes on retrouve les revenus de placements (20.3%) et les transferts à des fins générales en provenance d'autres administrations publiques (19.8%). Parmi les fléchissements on retrouvent les ventes de biens et de services avec une baisse de 11.6% et les autres recettes avec une diminution de 2.3%.

À l'exception de planification et aménagement des régions qui a fléchi de 11.8%, tous les autres fonctions importantes de dépense ont marqué des progressions. En ce qui concerne les fonctions de dépense, le fait marquant a été la hausse de 82.1% par rapport à 1978-79 pour transferts à fins générales aux administrations locales. Cette progression résulte principalement du programme de réduction de la dette des administrations locales dans la Province de l'Alberta. Cette fonction de dépense est aussi touchée par la réforme de la fiscalité municipale dans la Province de Québec, comme suite à cette réforme les transferts aux municipalités dans cette Province ont diminué de 25.8%. Les fonctions 'Santé' 'Services sociaux' et 'Éducation' ont enregistré des hausses de 11%,

and Education (8.8%); the corresponding growth rates for 1978-79 were 9.7%, 10.9% and 5.7%. Debt charges increased 17.1% over the previous year a moderation of the growth rate of 22.8% reported in 1978-79.

All provinces recorded increased revenue relative to 1978-79 ranging from 9.5% for Newfoundland and Prince Edward Island, to 20.7% for British Columbia. Increases in expenditure ranged from 9.9% for Prince Edward Island to 41.3% for Alberta.

Text Table I illustrates revenue sources as percentages of gross general revenue of each government in 1978-79.

Text Table II depicts 1978-79 expenditure functions for each government as percentages of gross general expenditure for that year.

Québec Pension Board

The data in this report for the province of Québec includes the revenues and expenditures of the Québec Pension Board, established by the province in 1965. (See Text Table III).

The only transactions, included at the provincial level (except Québec) as universal pension plans expenditures, are the contributions of provincial governments as employers to the Canada Pension Board. Being a federal agency, the revenues and expenditures are included in the federal government universe.

Text Table IV shows the position of the province of Québec in the case where the Québec Pension Board would have been considered a sub-sector of the provincial government universe instead of part of the universe.

Inter-Provincial Comparability

The "gross general" concept of revenue and expenditure as applied in this publication provides a measure of inter-provincial comparability but only at the general government level. Because of the varying importance of provincial government enterprises in the activities of the provincial public sub-sector in the ten provinces and the two territories and, even more, because of the divergences in the allocation of responsibilities between provincial and local governments among the provinces, complete comparability can only be achieved when provincial government and provincial enterprise operations are integrated and

12.9% et 8.8% respectivement en comparaison à des augmentations de 9.7%, 10.9, et 5.7% pour l'année 1978-79. Le service de la dette progresse de 17.1% en 1979-80, ce qui représente un ralentissement par rapport à la croissance de 22.8% en 1978-79.

En 1979-80 toutes les provinces ont accru leurs recettes. Les variations par rapport à 1978-79, vont de 9.5% pour Terre-Neuve et Île-du-Prince-Édouard à 20.7% pour la Colombie-Britannique. Quant aux dépenses, les augmentations varient entre 9.9% pour Île-du-Prince-Édouard et 41.3% pour la Province de l'Alberta.

Le tableau explicatif I présente les sources de revenu de chaque administration en 1978-79 en pourcentage de ses recettes générales brutes.

Le tableau explicatif II présente les fonctions de dépense de chaque administration en 1978-79 en pourcentage des dépenses générales brutes.

Régie des rentes du Québec

Les données de la province de Québec figurant dans la présente publication comprennent les recettes et des dépenses de la Régie des rentes du Québec, organisme créé par la province en 1965. (Voir le tableau explicatif III).

Les seules transactions incluses au niveau provincial (sauf Québec) comme dépenses pour les régimes universaux de rentes, sont les contributions des gouvernements provinciaux à titre d'employeur au Régime de pension du Canada. Étant un organisme fédéral, les recettes et les dépenses sont inclus dans l'univers gouvernemental fédéral.

Le tableau explicatif IV présente la position de la province de Québec dans le cas où la Régie des rentes du Québec serait considérée comme une sous-section de l'univers gouvernemental provincial plutôt que partie intégrante de l'univers.

Comparabilité interprovinciale

Le concept des recettes et des dépenses "générales brutes" tel qu'il s'applique ici fournit une mesure de la comparabilité inter-provinciale, mais au niveau de l'univers gouvernemental seulement. Étant donné que l'importance des entreprises publiques provinciales dans les activités du sous-secteur public provincial des dix provinces et des deux territoires varie, et plus encore par suite des divergences dans l'attribution des responsabilités entre les gouvernements provinciaux et les administrations locales d'une province à l'autre, on ne peut obtenir une comparabilité parfaite que lorsque les opérations des gouvernements provinciaux et de leurs entreprises sont intégrées et lorsque les transactions publiques

provincial and local government transactions are consolidated. This consolidation of the revenues and expenditures of the provincial and local government levels into a combined provincial-local statistical universe is presented in the Statistics Canada publication *Consolidated Government Finance* (Catalogue 68-202) in which the inter-level transactions are eliminated.

Explanatory Comments

Tables 1 and 2 Gross General Revenue and Expenditure

These tables include the current and capital revenue and expenditure transactions of the provincial government universe.

In order to achieve a measure of inter-provincial comparability, certain adjustments have been made to the figures shown in the provincial accounts. Reconciliations of "gross general" revenue and expenditure with provincial accounts are found in Tables 3 and 4. The adjustments are explained more fully in the commentary to those tables.

Text Table V indicates the detail of the "Miscellaneous taxes — other" item on Table 1.

Tables 3 and 4 Reconciliation of Gross General Revenue and Expenditure with Provincial Accounts

These tables are included to explain the difference between current and capital revenue and expenditure as presented in provincial and territorial accounts, and gross general revenue and expenditure as compiled for the financial management series.

The revenues and expenditures of the special funds are accounted for separately and are not included in provincial or territorial revenues and expenditures despite the fact that the agencies in question perform functions that are really of a governmental nature. For purposes of establishing gross general revenue and expenditure, the transactions of these funds are added to budgetary transactions.

Because of variations in the extent to which provincial and territorial governments deduct amounts from revenue and expenditure in their financial statements, adjustments also are made in the series to reverse all of these deductions and to arrive at "gross" revenue and expenditure.

provinciales et locales sont consolidées. Cette consolidation des recettes et des dépenses publiques provinciales et locales en un univers statistique combiné provincial-local, est exposé dans la publication de Statistique Canada intitulée *Les Finances Publiques Consolidées* (numéro 68-202 au catalogue), et dans laquelle les opérations entre divers niveaux sont éliminées.

Commentaires explicatifs

Tableaux 1 et 2 Recettes et dépenses générales brutes

Ces tableaux comprennent les recettes et les dépenses ordinaires et de nature capitale de l'univers des gouvernements provinciaux.

Dans un souci de comparabilité interprovinciale, on a apporté certains ajustements aux chiffres figurant dans les comptes provinciaux. Les rapprochements des recettes et des dépenses "générales brutes" des comptes provinciaux se trouvent aux tableaux 3 et 4. Les ajustements sont expliqués plus en détail dans les commentaires de ces tableaux.

Le tableau explicatif V donne le détail du poste "Diverses impositions — autres" du tableau 1.

Tableaux 3 et 4 Rapprochement des recettes et des dépenses générales brutes avec celles des comptes provinciaux

On a inclus ces tableaux pour expliquer la différence entre les recettes et les dépenses ordinaires et de nature capitale tels qu'ils figurent dans les comptes des provinces et des territoires, et les recettes et dépenses générales brutes établies pour les séries de la gestion financière.

Les recettes et les dépenses des fonds spéciaux sont comptabilisés séparément et ne sont pas pris en compte dans les recettes et les dépenses des gouvernements provinciaux ou territoriaux en dépit du fait que les activités des organismes en question sont réellement de nature gouvernementale. Pour établir les recettes et les dépenses générales brutes, on ajoute les opérations de ces fonds aux opérations budgétaires.

Les sommes que les gouvernements provinciaux et territoriaux déduisent dans leurs états financiers des recettes et des dépenses pouvant varier, on apporte également des ajustements aux séries pour annuler toutes ces déductions et obtenir les recettes et les dépenses "brutes".

The trading operations of liquor boards are treated in the financial management series as enterprises and only their remitted trading profits are included in provincial or territorial revenues. In some provinces, however, liquor boards also carry out regulatory or control functions and derive revenue from these activities. This revenue, generally in the form of licences and permits, and the related expenditure are considered to be general government revenue and expenditure. Therefore, they represent an adjustment to the revenue and expenditure presented in the provincial government financial statements.

A uniform approach to the treatment of working capital funds in the financial management series results in adjustments to both revenue and expenditure. This compensates for the different presentation of such funds in the provincial and territorial accounts.

An attempt is also made to apply a consistent approach to recoveries of expenditure and refunds of revenue. A number of items regarded by the provinces as revenue or expenditure are considered to represent recoveries of current and prior year expenditures or refunds of current year revenues. Consequently they are excluded from gross general revenue and expenditure.

Non-revenue and surplus receipts and non-expenditure and surplus payments represent items which are not regarded as provincial government revenue and expenditure transactions in this series. They also include such items as repayments of loans and advances, revenues collected on behalf of other jurisdictions, purchases and sales of investments, loans and advances and other surplus account transactions.

The deduction of intragovernment transactions represents the elimination of transactions among the component parts of the general government statistical universe for each province. Departmental expenditures included in the revenues of special funds and vice-versa, revenues of one special fund treated as expenditure in another special fund, and transfers of funds between departments would all result in the duplication of revenue and expenditure when these entities are combined to form the statistical universe for any particular province. It, therefore, becomes necessary to identify and eliminate these interfund or intra universe transactions.

Table 5 Economic Classification of Gross General Revenue

This table classified the gross general revenue of the financial management series by economic sources. The sources of government revenue for economic

Les activités commerciales des régies des alcools sont considérées dans les séries de la gestion financière comme des entreprises publiques et seuls leurs profits d'exploitation remis figurent dans les recettes provinciales ou territoriales. Cependant, dans certaines provinces, les régies des alcools ont également des fonctions réglementaires ou de contrôle d'où elles tirent des recettes. Ces dernières, généralement sous la forme de droits et de permis, ainsi que les dépenses correspondantes, sont considérées comme des recettes et des dépenses de l'univers gouvernemental et constituent donc un ajustement aux recettes et aux dépenses figurant dans les états financiers des gouvernements provinciaux.

Une approche uniforme dans le cas des fonds de roulement dans les séries de la gestion financière a donné lieu à des ajustements aux recettes et aux dépenses pour compenser la différence de présentation de ces fonds dans les comptes provinciaux et territoriaux.

On essaie également d'utiliser une approche homogène dans le cas des recouvrements de dépenses et des remboursements de recettes. Un certain nombre de postes considérés par les provinces comme des recettes ou des dépenses sont considérés comme des recouvrements des dépenses de l'année courante ou comme des remboursements des recettes de l'année courante, et sont de ce fait exclus des recettes et des dépenses générales brutes.

Les entrées de fonds qui ne sont pas des recettes et les entrées au titre de l'excédent, ainsi que les paiements qui ne sont pas des dépenses et ceux qui sont prélevés sur l'excédent, constituent les postes qui ne sont pas considérés comme des recettes et des dépenses des gouvernements provinciaux dans cette série; elles comprennent notamment les remboursements l'emprunts et d'avances, les recettes recueillis pour le compte d'autre autorités, les achats et les ventes de placements, les prêts et avances et les autres opérations au titre du compte de l'excédent.

La déduction des transactions entre les composantes du gouvernement consiste à éliminer les opérations entre les éléments constitutifs de l'univers statistique gouvernemental de chaque province. Les dépenses d'un ministère comprises dans les recettes d'un fonds spécial et inversement, les recettes d'un fonds spécial considérées comme dépenses dans un autre fonds spécial, les transferts de fonds entre les ministères; tous ces éléments amèneraient un double comptage des recettes et des dépenses lorsque l'on regroupe ces entités pour former l'univers statistique d'une province donnée. Il devient donc nécessaire d'isoler et d'éliminer ces opérations entre fonds ou à l'intérieur de l'univers.

Tableau 5 Classification économique des recettes générales brutes

Ce tableau classe les recettes générales brutes des séries de la gestion financière selon les sources économiques. Les sources des recettes publiques aux fins économiques sont les impôts

purposes are direct taxes on persons and business, indirect taxes, other current transfers from persons, transfers from other levels of government, investment income and other.

Direct taxes. Direct taxes include personal and corporation income taxes, payroll tax, succession duties and the levies imposed on logging and mining profits. Employee contributions to non-trusted pension plans, contributions to the Québec Pension Board and Workmen's Compensation Board assessments are also considered as direct taxes — persons.

Indirect taxes. Indirect taxes encompass sales taxes, motor fuel taxes, insurance premiums, capital and place of business taxes, amusement taxes and real and personal property taxes. Privileges, licences and permits purchased by business entities such as motor vehicles licences, natural resource exploration permits, etc., are also regarded as indirect taxes.

Other Current Transfers from Persons. Transfers from persons consist of health insurance premiums, personal motor vehicle permits and licences, and other licences and permits such as fishing, hunting and marriage licences. Fines and penalties also fall into this economic category.

Transfers from Other Levels of Government. This category includes both general and specific purpose transfers from federal and local governments. The provincial share of federal estate tax, the tax on undistributed income and income tax on privately owned public utilities are classified as transfer payments at the provincial government level.

Investment income. Interest, dividends and profits on foreign exchange, royalties and the remitted profits of government enterprises as well as liquor boards are included under this economic classification.

Other revenue. For example, sales of goods and services sales of land and fixed assets and other revenue items are not regarded as adding to production in the economic sense.

directs des particuliers et des entreprises, les impôts indirects, les autres transferts courants des particuliers, les transferts d'autres niveaux d'administration publique, les revenus de placements et autres.

Impôts directs. Les impôts directs comprennent les impôts sur le revenu des particuliers et des corporations, l'impôt sur la feuille de paie, les droits successoraux et les droits imposés sur les bénéfices forestiers et miniers. Les cotisations des employés aux régimes de pension gérés par le gouvernement, les cotisations au Régimes des rentes du Québec et les versements à la Caisse d'indemnisation des accidents du travail sont également considérés comme des impôts directs.

Impôts indirects. Les impôts indirects comprennent les taxes de vente, les taxes sur les carburants, les taxes sur le revenu de primes des compagnies d'assurance, les taxes sur le capital et les taxes d'affaires, les taxes sur les spectacles ainsi que les impôts sur la propriété foncière et personnelle. Les privilèges, droits et permis achetés par les entités commerciales, tels que les permis pour véhicules automobiles, les permis portant sur l'exploitation des ressources naturelles, etc., sont également considérés comme des impôts indirects.

Autres transferts courants des particuliers. Les transferts des particuliers comprennent les primes personnelles pour véhicules automobiles et les droits et autres permis tels que les permis de pêche, de chasse et de mariage. Les amendes et pénalités entrent également dans cette catégorie économique.

Transferts d'autres niveaux d'administration publique. Cette catégorie comprend les transferts à des fins générales et à des fins spécifiques du gouvernement fédéral et des administrations locales. La part provinciale de l'impôt fédéral sur les biens transmis par décès, l'impôt sur le revenu non distribué des sociétés et l'impôt sur le revenu des services privés d'utilité publique sont classés comme des transferts au niveau du gouvernement provincial.

Revenus de placements. Les intérêts, dividendes et le profit sur le change étranger, les redevances et les bénéfices déclarés des entreprises publiques ainsi que les régies des alcools figurent sous cette rubrique.

Autres recettes. Par exemple, les ventes de biens et de services les ventes de terrains et d'immobilisations ainsi que d'autres éléments de revenu dont on ne considère pas, au sens économique, qu'ils contribuent à la production.

Table 6 Economic Classification of Gross General Expenditure

The objects of expenditure used in the economic classification are purchases of goods and services and transfer payments to persons, business and other levels of government.

Purchases of Goods and Services This classification includes all current expenditures of government on such salaries and wages, materials and supplies, travelling expenses, professional services, purchases of land, write-offs of bad debts and other final expenditures. For purposes of this publication, transfer payments to public hospitals are also treated as purchases of goods and services.

Transfers to Persons. Transfers to persons consist of payments to individuals and non-profit institutions for which no direct service is rendered by the recipients. Included in this latter group are universities, other post-secondary educational facilities and private non-commercial organizations and associations. For purposes of this publication, interest on the public debt is also treated as a transfer to persons.

Transfers to Business. This category includes both subsidies for current operations and capital assistance payments made to business. Subsidies for current operations represent payments designed to make it possible for producers to stabilize or lower prices while capital assistance covers grants made to commercial enterprises to assist in the acquisition of new facilities or machinery and equipment. Home-owners' subsidies paid by provincial governments in Saskatchewan, Alberta and British Columbia are also included in transfers to business.

Transfers to Other Levels of Government. Transfers to other levels of government consist of grants to local governments. The term "local government" refers to municipalities, local school boards and other municipally organized bodies such as conservation authorities.

Table 7 Historical Summary of Gross General Revenue and Expenditure

This table presents actual data for four years, estimated data for a year on gross general revenue by source and gross general expenditure by function for

Tableau 6 Classification économique des dépenses générales brutes

Les articles de dépenses utilisés dans la classification économique sont les achats de biens et de services et les paiements de transfert aux particuliers, aux entreprises et à d'autres niveaux d'administration publique.

Achats de biens et de services. Sous cette catégorie figurent toutes les dépenses ordinaires des gouvernements pour des postes tels que les traitements et salaires, les matières et les fournitures, les dépenses de voyage, les services professionnels les achats de terrain, l'amortissement des créances douteuses et autres dépenses finales. Dans la présente publication les transferts aux hôpitaux publics sont également considérés comme des achats de biens et services.

Transferts aux particuliers. Les transferts aux particuliers consistent en paiements aux particuliers et aux institutions sans but lucratif et en échange desquels les bénéficiaires ne rendent aucun service direct. Dans cette catégorie se trouvent les universités, les autres établissements d'enseignement post-secondaire ainsi que les organismes et associations privés non commerciaux. Dans la présente publication, l'intérêt sur la dette publique est également considéré comme un transfert à des particuliers.

Transferts aux entreprises. Sous cette rubrique entrent les subventions au titre des opérations ordinaires et les paiements sous forme de subventions pour fins d'immobilisation versés aux entreprises. Les subventions au titre des opérations ordinaires représentent des paiements destinés à permettre aux producteurs de stabiliser ou d'abaisser leurs prix, cependant que les subventions pour fins d'immobilisation portent sur des transferts consentis aux entreprises commerciales pour les aider à acquérir de nouvelles installations ou des machines et du matériel. Les subventions aux propriétaires de maisons payées par les gouvernements de la Saskatchewan, de l'Alberta et de la Colombie-Britannique font également partie des transferts aux entreprises.

Transferts à d'autres niveaux d'administration publique. Les transferts à d'autres niveaux d'administration publique comprennent les allocations aux administrations publiques locales. Par "administration publique locale", on entend les municipalités, les conseils scolaires locaux et autres formations organisées en municipalités, comme par exemple les offices de conservation.

Tableau 7 Sommaire chronologique des recettes et des dépenses générales brutes

Ce tableau regroupe les données réelles pour quatre années et les données estimatives pour une année en ce qui concerne les recettes générales brutes par source et les dépenses

each province and territory. Data are also presented at the Canada total. Actual data are obtained from the present publication while estimated amounts are to be found in the publication entitled *Provincial Government Finance — Revenue and Expenditure* (Estimates) (Catalogue 68-205).

générales brutes par fonction, par province et par territoire et pour l'ensemble du Canada. Les chiffres réels proviennent de la présente publication, tandis que les estimations sont extraites de la publication intitulée — *Les Finances des gouvernements provinciaux — Recettes et dépenses* (Prévisions) numéro 68-205 au catalogue.

Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Provincial Section,
Public Finance Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 995-8201) or to the Statistics Canada reference centre in:

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0V7.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolinguée et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section provinciale,

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
 - nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- † revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

Because of rounding, totals and sub-totals for statistical tables may differ slightly from the sum of their component parts.

The reader is cautioned that data for fiscal years prior to the 1970 issue of this publication are not comparable because of changes in coverage. To assist users, the Public Finance Division has undertaken to provide the principal items of information required to adjust data for the years 1965 to 1969 to the new basis. This information may be obtained upon request from the Public Finance Division, Statistics Canada, Ottawa.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
 - néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- † nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTA

À cause de l'arrondissement des chiffres, les totaux et sous-totaux ne correspondent pas toujours à l'addition de leurs composants.

Le lecteur est averti que les données de cette publication pour les années fiscales précédentes à 1970 ne sont pas directement comparable par suite des changements apportés à la couverture statistique. Pour venir en aide aux utilisateurs, la Division des finances publiques a entrepris de fournir les principales informations nécessaires à l'ajustement sur la nouvelle base des données pour les années 1965 à 1969. Ces informations sont disponibles sur demande auprès de la Division des finances publiques, Statistique Canada, Ottawa.

Introduction

This publication presents the revenues and expenditures of the governments of each of the Canadian provinces and territories in the form of government financial management statistics. The primary objective of the publication is to meet the needs of users of financial information pertaining to the activities of these governments by converting the idiosyncratic data produced by each government into standardized statistics which are compatible as between these governments (and also with those of other levels of government produced by the Public Finance Division of Statistics Canada) and are consistent from one reference period to another.

The Financial Management Statistics System

The concepts and classifications underlying this statistical system are described in detail in the publication “The Canadian System of Government Financial Management Statistics” (Catalogue (68-506). Canadian governments at all three levels — federal, provincial and local — display much the same organizational structure — a legislature to which is subordinated a central core of departments to which, in turn, are attached numbers of agencies with varying degrees of autonomy. However, this general similarity of structure disappears when a detailed examination is made. Similarly-named entities perform quite different roles in different governments; services provided by a department in one government are provided by an agency in a second and are not provided at all in a third; and, while most agencies provide “government-type” services, others provide goods or services which in other jurisdiction could be, and often are, provided by non government commercial entities. Furthermore, since most government finance reports are designed to show administrative accountability and hence are closely related to organizational structures, the raw data contained in these reports are practically useless for any study which seeks to relate the financial activities of one government to those of another.

Introduction

Cette publication présente les recettes et dépenses publiques de chaque province ou territoire du Canada sous forme de statistiques de la gestion financière des gouvernements. Elle vise d'abord à répondre aux besoins des utilisateurs en renseignements financiers relatifs aux activités de ces gouvernements en transformant les données particulières produites par chacun en statistiques normalisées pour les divers gouvernements (compatibles avec celles produites par la Division des finances publiques de Statistique Canada sur d'autres niveaux de gouvernement) et comparables d'une période de référence à une autre.

Système statistique de la gestion financière

Les concepts et classifications qui sous-tendent ce système statistique sont décrits en détail dans la publication “Le système canadien des statistiques de la gestion financière” (no 68-506 au catalogue). Les trois paliers de gouvernement au Canada — fédéral, provincial et local — se ressemblent beaucoup; ils comprennent une assemblée législative dont relève un groupe central de ministères ou services auxquels se rattachent une grande quantité d'organismes jouissant de divers degrés d'autonomie. Cependant, cette similitude de structure ne soutient pas un examen détaillé. Des ministères ou services ayant des noms semblables diffèrent sensiblement dans le cas de certains gouvernements; certains services fournis par un ministère dans une province le sont par un organisme dans une autre et ne le sont pas dans une troisième; de plus, bien que la plupart des organismes assurent des services “publics”, d'autres organismes fournissent des biens ou services qui, ailleurs, pourraient être fournis, et le sont souvent, par l'entreprise privée. Comme la plupart des rapports financiers des gouvernements font état de la responsabilité administrative et, par conséquent, suivent de près la structure de l'organisation, les données qu'ils renferment sont presque inutiles pour toute étude visant à comparer les activités financières de divers gouvernements.

The Canadian System of Government Financial Management Statistics seeks to overcome the lack of homogeneity in raw government financial information at the provincial/territorial level in the following ways:

The government universe is divided in two parts — general government and government enterprises. The general government consists of:

Departments of government;

special funds (see “Appendix” for the list of special funds included in this report):

administrative and regulatory funds which perform functions similar to those of government departments;

agencies engaged in “industrial” or “commercial” activities, primarily to service the requirements of their own governments;

agencies engaged primarily in the channelling of funds from one level of government to another or among organizations at the same level of government, e.g., bodies established by provincial legislation to help finance the capital programs of municipalities and school boards;

Workers’ Compensation Boards;

government-owned institutions such as those engaged in education, health and welfare services or administration of justice, e.g. agricultural schools, residences for handicapped persons, gaols, etc.;

Quebec Pension Plan;

non-trusted public service pension plans because their funds constitute an integral part of the consolidated revenue fund or which are otherwise available to the government in the financing of its operations;

working capital funds.

All entities classified to general government are consolidated into a single statistical unit for each government.

Revenues of each unit are classified by source and expenditures by function or purpose, while assets and liabilities conform with normal accounting classifications.

Le système canadien des statistiques de la gestion financière cherche à corriger le manque d’homogénéité entre les renseignements financiers fournis par les diverses provinces ou territoires par les moyens suivants:

L’univers est subdivisé en deux parties: l’univers gouvernemental et celui des entreprises publiques. L’univers gouvernemental comprend:

les ministères;

les fonds spéciaux (voir “la liste” des fonds spéciaux en annexe):

fonds administratifs et réglementaires dont les fonctions sont semblables à celles des ministères;

organismes ayant une activité “industrielle” ou “commerciale” pour répondre avant tout aux besoins des gouvernements dont ils relèvent;

organismes dont l’activité principale est l’acheminement de fonds d’un échelon de gouvernement à un autre ou entre des organismes d’un même échelon, comme ceux créés par des lois provinciales pour aider au financement des investissements des municipalités et des conseils scolaires;

commissions des accidents du travail;

les établissements appartenant à des gouvernements comme ceux qui s’occupent de l’éducation, de la santé et du bien-être social, ou de l’administration de la justice. Dans cette catégorie, entrent les écoles d’agriculture, les résidences pour personnes handicapées, les prisons, etc.

Le régime des rentes du Québec;

les régimes de pensions de la Fonction publique non constitués en fiducie parce que leurs fonds forment une partie intégrante du fonds consolidé du revenu ou sont de toute autre manière à la disposition du gouvernement pour le financement de ses activités;

les fonds de roulement.

Toutes les entités classées dans l’univers gouvernemental sont groupées en une seule unité statistique pour chaque gouvernement.

Les recettes de chaque unité sont classés par source et les dépenses par fonction ou but, tandis que les éléments d’actif et de passif suivent les classifications comptables normales.

A government enterprise is an organized entity, usually corporate, established by a government to produce goods or services for sale on the open market at prices related to costs (this relationship being ascertainable from its own independent system of accounts), which has relatively autonomous management of its affairs and is staffed by other than public servants, though certain staff benefit schemes, e.g., superannuation, may be integrated with those of the public service of the parent government. The enterprises are classified by parent government and by Standard Industrial Classification. Financial statistics classifications for enterprises generally accord with those of commercial accounting.

While the foregoing outlines the bases on which the financial management system rests, the reader is urged to refer to the descriptive publication mentioned above to obtain the more detailed knowledge which is a prerequisite for the full comprehension and use of the statistics produced in accordance with this system. The full range of these statistical series is listed on the rear cover of the present publication.

The National Accounts Statistical System

A second national standardized system for the production of financial statistics of Canadian governments is contained in the framework of the Canadian System of National Accounts. While the financial management system depicts the expenditures made by government to discharge its functions, the relative importance of the different types of revenue raised to defray these expenditures, the means used to finance the deficit between revenue and expenditure or to dispose of any surplus of revenue over expenditure and the resulting financial situation of government; the economic analysis system is concerned with the economic effects of government activity. Although there are significant differences between the two systems in concepts and, particularly, in classifications, it is possible, as is shown in this publication, to cross-classify government financial data in economic terms. But, just as the resulting financial management statistics differ significantly from the estimates or public accounts from which they are derived, so the economic analysis statistics differ from the national income and expenditure accounts.

Coverage, Sources and Validity

The present publication covers the general government universe of each province and territory on an all-inclusive basis except for certain institutions for which complete financial reports are unavailable.

Une entreprise publique est une personne morale, habituellement une société, créée par un gouvernement pour produire des biens ou services en vue de leur vente sur le marché libre à des prix établis en fonction des coûts (cela peut être vérifié à partir de son propre système indépendant de comptes), qui gère ses propres affaires de façon relativement autonome et dont le personnel n'est pas constitué de fonctionnaires, bien que certains avantages sociaux, comme la pension de retraite, puissent être intégrés à ceux du gouvernement dont elle relève. Les entreprises sont classées selon le gouvernement dont elles relèvent et les catégories de la Classification des activités économiques. La statistique financière des entreprises correspond généralement à la comptabilité commerciale.

Même si nous venons d'esquisser les bases du système de gestion financière, nous prions le lecteur de se reporter à la publication mentionnée plus haut afin de mieux connaître ces bases, une condition essentielle à la parfaite compréhension et à l'utilisation des statistiques produites conformément à ce système. Vous trouverez la liste complète de ces séries statistiques sur la partie arrière de la couverture de cette publication.

Système statistique des comptes nationaux

Le système canadien de la comptabilité nationale est un deuxième système national normalisé pour la statistique financière des gouvernements canadiens. Alors que le système de la gestion financière présente les dépenses effectuées par les gouvernements pour s'acquitter de leurs fonctions, l'importance relative des différentes sources de recettes perçues pour assumer ces dépenses, les moyens utilisés pour financer le manque de recettes par rapport aux dépenses ou pour disposer l'excédent des recettes sur les dépenses et la situation financière finale des gouvernements; le système d'analyse économique s'intéresse, pour sa part, aux incidences économiques de leurs activités. En dépit de différences conceptuelles sensibles entre les deux systèmes, principalement dans les classifications, il est possible, comme le démontre cette publication, de recouper les données financières en termes économiques. Mais, tout comme les statistiques sur la gestion financière diffèrent considérablement des budgets ou des comptes publics dont elles sont dérivées, les résultats de l'analyse économique sont différents de ceux des comptes nationaux des recettes et dépenses.

Champ d'observation, sources et validité

La présente publication englobe toutes les activités gouvernementales de chaque province ou territoire, sauf certaines institutions pour lesquelles il n'existe pas de rapports financiers complets. Nous n'avons tenu compte de ces institutions

These institutions are incorporated only to the extent of their financial transactions with their present governments; certain very minor revenues which these institutions obtain from other sources are omitted from the publication as are detailed analyses of their expenditures.

The financial statistics in this publication are derived from information contained in the public accounts of the governments and from the audited financial statements of their agencies. Additional detail is obtained in a few instances from correspondence with provincial and territorial authorities. The co-operation of provincial and territorial government officials is gratefully acknowledged.

The main tables in this publication have been reviewed by officials of the governments to which the data relates but final responsibility for the validity of the statistics remains with the Provincial Government Section of the Public Finance Division of Statistics Canada.

Revision of the Financial Management Statistics System

The most recent publication describing the Financial Management Statistics System (Catalogue 68-506) was issued in September 1972; amendments were issued in April 1974. Public Finance Division commenced a review of the System in 1979. This review has concentrated on strengthening the conceptual framework of the System, developments in government operations in the decade now ended together with changes in user requirements have necessitated some modifications to the revenue and expenditure classifications.

While no changes have been made to individual revenue classifications, "Taxes" have been re-aligned into five groups — "Income Taxes", "Property and Related Taxes", "Consumption Taxes", "Health and Social Insurance Levies", and "Miscellaneous". This arrangement is more logical than that previously employed which appeared to give undue prominence to certain relatively minor categories.

While the changes made to expenditure classifications are more noticeable they should not affect the continuity of the series except in one relatively minor instance.

The function "Social Welfare" has been renamed "Social Services" and re-structured to provide greater clarity. It now comprises the sub-functions "Social Security", "Labour Force Plans", "Family Allowances", "Veterans Benefits", "Social Welfare", "Tax Credits and Rebates", and "Other Social Services".

que pour leurs transactions financières avec le gouvernement dont elles relèvent; cette publication ne prend pas en compte certaines recettes très faibles provenant d'autres sources et n'analyse pas leurs dépenses en détail.

Les statistiques financières de cette publication sont tirées de renseignements contenus dans les comptes publics des gouvernements et dans les états financiers vérifiés des organismes qui en dépendent. Dans quelques cas, des détails supplémentaires ont été obtenus directement des autorités provinciales ou territoriales. Nous remercions les fonctionnaires des provinces et territoires de la collaboration qu'ils nous ont accordée.

Les principaux tableaux de cette publication ont été vérifiés par les fonctionnaires compétents des gouvernements, mais c'est la Section des administrations provinciales, Division des finances publiques, Statistique Canada, qui a la responsabilité définitive des statistiques.

Révision du Système des statistiques de la gestion financière

La dernière publication décrivant le Système des statistiques de la gestion financière (no 68-506 au catalogue) remonte à septembre 1972, bien que des modifications aient été apportées en avril 1974. La Division des finances publiques a entrepris une révision du système en 1979. Cette révision vise surtout à donner plus de rigueur au cadre conceptuel du système; l'évolution des activités gouvernementales au cours de la dernière décennie, accompagnée des changements qu'ont connus les besoins des utilisateurs, a rendu nécessaire la modification de la structure des recettes et des dépenses.

Aucune modification n'a été apportée aux rubriques portant sur les recettes, mais les "impôts" sont maintenant divisés en cinq groupes: "impôts sur le revenu", "impôts fonciers et impôts connexes", "taxes à la consommation", "cotisations aux régimes d'assurance-maladie et d'assurance sociale" et "impôts divers". Cette structure est plus logique que la précédente où certaines fonctions de moindre importance semblaient occuper une place prépondérante.

Bien que les modifications effectuées au chapitre des dépenses soient plus nombreuses, la continuité des séries ne devrait pas être menacée, sauf dans un cas d'assez peu d'importance.

La fonction "bien-être social" s'appelle maintenant "services sociaux" et est restructurée en vue d'une meilleure clarté. On y trouve les sous-fonctions "sécurité sociale", "régimes concernant la population active", "allocations familiales", "prestations aux anciens combattants", "bien-être social", "crédits et dégrèvements d'impôt" et "autres services de bien-être social".

Because it has become increasingly difficult to distinguish between expenditures related to conservation and those aimed at development, the two functions, "Natural Resources" and "Agriculture, Trade and Industry, and Tourism", have been combined into a single function, "Resource Conservation and Industrial Development". All the sub-functions of both former functions are allocated to the new function.

The function "Supervision and Development of Regions" has been re-named more appropriately "Regional Planning and Development". While the overall concept remains unchanged, four sub-functions - "Planning and Zoning", "Community Development", "Regional Development" and "Other" - are also now identified.

The sub-function "Regulatory Services" has been re-defined and re-named "Regulatory Measures". Previously, all expenditures related to regulatory activities were assigned to this classification. Such assignment, however, is now recognized to conflict with one of the basic principles of the System under which an expenditure is classified in terms of the service thereby provided. As a consequence, where the purpose of a particular regulation or regulatory program is to protect or foster a particular activity or industry, expenditures on the regulation or program are now classified under the same function as the related activity or industry.

Review of the 1980-81 Fiscal Year

Revenue and Expenditures

The gross general revenue of all provincial and territorial governments was 62.9 billion for the fiscal year ending March 31, 1981, an increase of 11.8% over the previous fiscal year. This increase represents a moderate decline compared to the 13.6% and 13.5% recorded in 1979-80 and 1978-79 respectively. Gross general expenditures at 62.5 billion is an increase of 13.0% over the previous year, lower than last year's increase of 13.8% but significantly higher than the increase reported in 1978-79 (11.4%) and 1977-78 (11.8%).

Among individual revenue sources the growth rate of natural resource revenue weakened considerably. This year's increase of 8.9% is much lower than the 23.7% increase reported in 1979-80 and the 25.2% reported in 1978-79. This weakness is the result of a decrease in production of conventional crude oil in the province of Alberta of 7.9% and a decline in the export sales of natural gas and lumber in British Columbia. The growth rate of transfers from the

Comme il est de plus en plus difficile de distinguer les dépenses affectées à la conservation de celles destinées au développement, les fonctions "ressources naturelles" et "agriculture, commerce et industrie, et tourisme" ont été groupées pour former la fonction "conservation des ressources naturelles et développement de l'industrie". Toutes les sous-fonctions des deux anciennes fonctions font maintenant partie de la nouvelle.

La fonction "surveillance et mise en valeur des régions" est maintenant appelée, de façon plus appropriée, "planification et aménagement des régions". Le concept général n'est pas modifié, mais quatre sous-fonctions sont maintenant définies: "urbanisme et zonage", "aménagement des agglomérations urbaines", "aménagement des régions" et "autres".

La sous-fonction "services de réglementation" a été redéfinie et s'intitule maintenant "mesures de réglementation". Auparavant, toutes les dépenses affectées aux activités de réglementation figuraient sous cette rubrique. Toutefois, on a constaté que cette façon de procéder dérogeait à l'un des principes fondamentaux du système voulant qu'une dépense soit classée selon le service auquel elle est affectée. Par conséquent, lorsque l'objet d'un règlement ou d'un programme réglementaire en particulier est de protéger ou d'encourager une certaine activité ou une certaine industrie, les dépenses consacrées au règlement ou au programme sont classées sous la fonction représentant l'activité ou l'industrie concernées.

Analyse de l'année financière 1978-79

Recettes et dépenses

Le recettes générales brutes des administrations publiques provinciales et territoriales pour l'année financière se terminant le 31 mars 1981 se chiffrent à 62.9 milliards soit une augmentation de 11.8% par rapport à l'exercice antérieur. Cette augmentation est moins élevée par rapport aux années 1979-80 (13.6%) et 1978-79 (13.5%). Les dépenses générales brutes se chiffrent à 62.5 milliard soit une hausse de 13.0% par rapport à l'exercice antérieur. Cette augmentation est moins élevée par rapport à l'année 1979-80 (13.8%) mais représente une croissance marquée par rapport aux années 1978-79 (11.4%) et 1977-78 (11.8%).

En ce qui concerne les sources des recettes, la croissance des recettes provenant des ressources naturelles a faibli considérablement. L'augmentation de 8.9% de cette année est beaucoup moins élevée que la hausse de 23.7% rapportée pour 1979-80 et de 25.2% pour 1978-79. Ce fléchissement du taux de croissance est causé par la diminution de la production du pétrole conventionnel de 7.9% en Alberta, et une diminution des ventes à l'exportation de gaz naturel et de bois de charpente en Colombie-Britannique. La croissance des

federal government also declined. General purpose transfers increase by 5.9% compared to the 19.7% increase recorded in 1979-80 and specific purpose transfer increased by 8.2% compared to the 10.8% reported in 1979-80.

With the exception of regional planning and development (down 1.7%) and general purpose transfers to local governments (down 51.1%) expenditures for all major functions increased. The decrease in general purpose transfers to local governments is due to the implementation of the Alberta Municipal Debt Reduction Act in 1979-80, a one year program which resulted in an increase of 82.2% in general purpose transfers to local government in 1979-80, and the continuing influence of the implementation of the Québec reform of municipal taxation which led to a decline of 56.6% in the province's transfers to local governments.

Expenditures on health rose dramatically this year, 17.6% compared to the 11.0% increase reported in 1979-80. The rate of increase ranged from 12.7% in the province of Québec to 28.4% in the province of Alberta. These increases reflect the continuing high cost of providing hospital and medical care services. The cost of providing education and social services continue to rise. Expenditure on education rose 13.9% in 1980-81 compared to 8.8% in 1979-80 while expenditures on social services increased by 13.2% compared to the 12.9% reported in 1979-80.

Debt charges increased 18.8% over the previous year, a slight increase over the 17.1% reported in 1979-80 but still below the 22.0% reported in 1978-79. All provinces recorded increased revenue relative to 1979-80 ranging from 5.9% for New Brunswick to 19.8% for Saskatchewan. Increases in expenditure ranged from 1.6% in Alberta to 21.3% in British Columbia.

Text Table I illustrates revenue sources as percentages of gross general revenue of each government in 1980-81.

Text Table II depicts 1980-81 expenditure functions for each government as percentages of gross general expenditure for that year.

Québec Pension Board

The data in this report for the province of Québec includes the revenues and expenditures of the Québec Pension Board, established by the province in 1965. (See Text Table III).

transferts en provenance de l'administration fédérale a aussi diminuée; les transferts à des fins générales ont augmenté de 5.9% comparativement à 19.8% pour l'année 1979-80; les transferts à des fins spécifiques ont augmenté de 8.2% comparés à l'augmentation de 10.8% pour 1979-80.

À l'exception de la fonction "planification et l'aménagement des régions" qui a fléchi de 1.7% et des transferts à des fins générales aux administrations locales qui ont également fléchi de 51.1%, toutes les autres fonctions importantes des dépenses ont marqué une progression. La diminution des transferts à des fins générales aux administrations locales provient d'un nouveau programme implanté en Alberta pour 1979-80 seulement, qui vise à réduire les dettes des municipalités; une hausse de 82.2% avait été enregistrée l'année passée. Cette diminution des transferts est également causée par la réforme fiscale des municipalités du Québec. Cette réforme a eu pour effet de diminuer les transferts de la province à ses municipalités de 56.6%.

On remarque également une forte augmentation des dépenses de 17.6% sous la fonction "santé" en 1980-81 comparativement à une hausse de 11.0% en 1979-80. Les variations par rapport à l'année précédente sont de 12.7% pour le Québec et de 28.4% pour l'Alberta, ce qui reflète bien l'augmentation continue des soins médicaux et hospitaliers. Les coûts de l'éducation et des services sociaux continuent aussi d'augmenter. En effet, ces coûts ont enregistré des hausses de 13.9% et 13.2% respectivement en comparaison avec des augmentations de 8.8% et de 12.9% pour l'année 1979-80. Le service de la dette a progressé de 18.8% par rapport à l'exercice précédent. Cette hausse est légèrement supérieure à l'augmentation de 17.1% de 1979-80 mais toujours inférieure à l'augmentation de 22.8% subie en 1978-79.

Toutes les provinces ont enregistré une hausse relative de leurs recettes. Par rapport à 1979-80 les accroissements varient de 5.9% pour le Nouveau-Brunswick à 19.8% pour la Saskatchewan. Quant aux dépenses, les augmentations varient entre 1.6% pour l'Alberta et 21.3% pour la Colombie-Britannique.

Le tableau explicatif I présente les sources de revenue de chaque administration en 1980-81 en pourcentage de ses recettes générales brutes.

Le tableau explicatif II présente les fonctions de dépense de chaque administration en 1980-81 en pourcentage des dépenses générales brutes.

Régie des rentes du Québec

Les données de la province de Québec figurant dans la présente publication comprennent les recettes et des dépenses de la Régie des rentes du Québec, organisme créé par la province en 1965. (Voir le tableau explicatif III).

The only transactions, included at the provincial level (except Québec) as universal pension plans expenditures, are the contributions of provincial governments as employers to the Canada Pension Board. Being a federal agency, the revenues and expenditures are included in the federal government universe.

Text Table IV shows the position of the province of Québec in the case where the Québec Pension Board would have been considered a sub-sector of the provincial government universe instead of part of the universe.

Inter-Provincial Comparability

The “gross general” concept of revenue and expenditure as applied in this publication provides a measure of inter-provincial comparability but only at the general government level. Because of the varying importance of provincial government enterprises in the activities of the provincial public sub-sector in the ten provinces and the two territories and, even more, because of the divergences in the allocation of responsibilities between provincial and local governments among the provinces, complete comparability can only be achieved when provincial government and provincial enterprise operations are integrated and provincial and local government transactions are consolidated. This consolidation of the revenues and expenditures of the provincial and local government levels into a combined provincial-local statistical universe is presented in the Statistics Canada publication *Consolidated Government Finance* (Catalogue 68-202) in which the inter-level transactions are eliminated.

Explanatory Comments

Tables 1 and 2 Gross General Revenue and Expenditure

These tables include the current and capital revenue and expenditure transactions of the provincial government universe.

In order to achieve a measure of inter-provincial comparability, certain adjustments have been made to the figures shown in the provincial accounts. Reconciliations of “gross general” revenue and expenditure with provincial accounts are found in Tables 3 and 4. The adjustments are explained more fully in the commentary to those tables.

Les seules transactions incluses au niveau provincial (sauf Québec) comme dépenses pour les régimes universals de rentes, sont les contributions des gouvernements provinciaux à titre d’employeur au Régime de pension du Canada. Étant un organisme fédéral, les recettes et les dépenses sont inclus dans l’univers gouvernemental fédéral.

Le tableau explicatif IV présente la position de la province de Québec dans le cas où la Régie des rentes du Québec serait considérée comme une sous-section de l’univers gouvernemental provincial plutôt que partie intégrante de l’univers.

Comparabilité interprovinciale

Le concept des recettes et des dépenses “générales brutes” tel qu’il s’applique ici fournit une mesure de la comparabilité inter-provinciale, mais au niveau de l’univers gouvernemental seulement. Étant donné que l’importance des entreprises publiques provinciales dans les activités du sous-secteur public provincial des dix provinces et des deux territoires varie, et plus encore par suite des divergences dans l’attribution des responsabilités entre les gouvernements provinciaux et les administrations locales d’une province à l’autre, on ne peut obtenir une comparabilité parfaite que lorsque les opérations des gouvernements provinciaux et de leurs entreprises sont intégrées et lorsque les transactions publiques provinciales et locales sont consolidées. Cette consolidation des recettes et des dépenses publiques provinciales et locales en un univers statistique combiné provincial-local, est exposé dans la publication de Statistique Canada intitulée *Les Finances Publiques Consolidées* (numéro 68-202 au catalogue), et dans laquelle les opérations entre divers niveaux sont éliminées.

Commentaires explicatifs

Tableaux 1 et 2 Recettes et dépenses générales brutes

Ces tableaux comprennent les recettes et les dépenses ordinaires et de nature capitale de l’univers des gouvernements provinciaux.

Dans un souci de comparabilité interprovinciale, on a apporté certains ajustements aux chiffres figurant dans les comptes provinciaux. Les rapprochements des recettes et des dépenses “générales brutes” des comptes provinciaux se trouvent aux tableaux 3 et 4. Les ajustements sont expliqués plus en détail dans les commentaires de ces tableaux.

Text Table V indicates the detail of the "Miscellaneous taxes — other" item on Table 1.

Le tableau explicatif V donne le détail du poste "Diverses impositions — autres" du tableau 1.

Tables 3 and 4 Reconciliation of Gross General Revenue and Expenditure with Provincial Accounts

These tables are included to explain the difference between current and capital revenue and expenditure as presented in provincial and territorial accounts, and gross general revenue and expenditure as compiled for the financial management series.

The revenues and expenditures of the special funds are accounted for separately and are not included in provincial or territorial revenues and expenditures despite the fact that the agencies in question perform functions that are really of a governmental nature. For purposes of establishing gross general revenue and expenditure, the transactions of these funds are added to budgetary transactions.

Because of variations in the extent to which provincial and territorial governments deduct amounts from revenue and expenditure in their financial statements, adjustments also are made in the series to reverse all of these deductions and to arrive at "gross" revenue and expenditure.

The trading operations of liquor boards are treated in the financial management series as enterprises and only their remitted trading profits are included in provincial or territorial revenues. In some provinces, however, liquor boards also carry out regulatory or control functions and derive revenue from these activities. This revenue, generally in the form of licences and permits, and the related expenditure are considered to be general government revenue and expenditure. Therefore, they represent an adjustment to the revenue and expenditure presented in the provincial government financial statements.

A uniform approach to the treatment of working capital funds in the financial management series results in adjustments to both revenue and expenditure. This compensates for the different presentation of such funds in the provincial and territorial accounts.

Tableaux 3 et 4 Rapprochement des recettes et des dépenses générales brutes avec celles des comptes provinciaux

On a inclus ces tableaux pour expliquer la différence entre les recettes et les dépenses ordinaires et de nature capitale tels qu'ils figurent dans les comptes des provinces et des territoires, et les recettes et dépenses générales brutes établis pour les séries de la gestion financière.

Les recettes et les dépenses des fonds spéciaux sont comptabilisés séparément et ne sont pas pris en compte dans les recettes et les dépenses des gouvernements provinciaux ou territoriaux en dépit du fait que les activités des organismes en question sont réellement de nature gouvernementale. Pour établir les recettes et les dépenses générales brutes, on ajoute les opérations de ces fonds aux opérations budgétaires.

Les sommes que les gouvernements provinciaux et territoriaux déduisent dans leurs états financiers des recettes et des dépenses pouvant varier, on apporte également des ajustements aux séries pour annuler toutes ces déductions et obtenir les recettes et les dépenses "brutes".

Les activités commerciales des régies des alcools sont considérées dans les séries de la gestion financière comme des entreprises publiques et seuls leurs profits d'exploitation remis figurent dans les recettes provinciales ou territoriales. Cependant, dans certaines provinces, les régies des alcools ont également des fonctions réglementaires ou de contrôle d'où elles tirent des recettes. Ces dernières, généralement sous la forme de droits et de permis, ainsi que les dépenses correspondantes, sont considérées comme des recettes et des dépenses de l'univers gouvernemental et constituent donc un ajustement aux recettes et aux dépenses figurant dans les états financiers des gouvernements provinciaux.

Une approche uniforme dans le cas des fonds de roulement dans les séries de la gestion financière a donné lieu à des ajustements aux recettes et aux dépenses pour compenser la différence de présentation de ces fonds dans les comptes provinciaux et territoriaux.

An attempt is also made to apply a consistent approach to recoveries of expenditure and refunds of revenue. A number of items regarded by the provinces as revenue or expenditure are considered to represent recoveries of current and prior year expenditures or refunds of current year revenues. Consequently they are excluded from gross general revenue and expenditure.

Non-revenue and surplus receipts and non-expenditure and surplus payments represent items which are not regarded as provincial government revenue and expenditure transactions in this series. They also include such items as repayments of loans and advances, revenues collected on behalf of other jurisdictions, purchases and sales of investments, loans and advances and other surplus account transactions.

The deduction of intragovernment transactions represents the elimination of transactions among the component parts of the general government statistical universe for each province. Departmental expenditures included in the revenues of special funds and vice-versa, revenues of one special fund treated as expenditure in another special fund, and transfers of funds between departments would all result in the duplication of revenue and expenditure when these entities are combined to form the statistical universe for any particular province. It, therefore, becomes necessary to identify and eliminate these interfund or intra universe transactions.

Table 5 Economic Classification of Gross General Revenue

This table classified the gross general revenue of the financial management series by economic sources. The sources of government revenue for economic purposes are direct taxes on persons and business, indirect taxes, other current transfers from persons, transfers from other levels of government, investment income and other.

Direct taxes. Direct taxes include personal and corporation income taxes, payroll tax, succession duties and the levies imposed on logging and mining profits. Employee contributions to non-trusteed pension plans, contributions to the Québec Pension Board and Workmen’s Compensation Board assessments are also considered as direct taxes — persons.

Indirect taxes. Indirect taxes encompass sales taxes, motor fuel taxes, insurance premiums, capital and place of business taxes, amusement taxes and real and personal property taxes. Privileges, licences and permits purchased by business entities such as motor vehicles licences, natural resource exploration permits, etc., are also regarded as indirect taxes.

On essaie également d'utiliser une approche homogène dans le cas des recouvrements de dépenses et des remboursements de recettes. Un certain nombre de postes considérés par les provinces comme des recettes ou des dépenses sont considérés comme des recouvrements des dépenses de l'année courante ou comme des remboursements des recettes de l'année courante, et sont de ce fait exclus des recettes et des dépenses générales brutes.

Les entrées de fonds qui ne sont pas des recettes et les entrées au titre de l'excédent, ainsi que les paiements qui ne sont pas des dépenses et ceux qui sont prélevés sur l'excédent, constituent les postes qui ne sont pas considérés comme des recettes et des dépenses des gouvernements provinciaux dans cette série; elles comprennent notamment les remboursements l'emprunts et d'avances, les recettes recueillis pour le compte d'autre autorités, les achats et les ventes de placements, les prêts et avances et les autres opérations au titre du compte de l'excédent.

La déduction des transactions entre les composantes du gouvernement consiste à éliminer les opérations entre les éléments constitutifs de l'univers statistique gouvernemental de chaque province. Les dépenses d'un ministère comprises dans les recettes d'un fonds spécial et inversement, les recettes d'un fonds spécial considérés comme dépenses dans un autre fonds spécial, les transferts de fonds entre les ministères; tous ces éléments amèneraient un double comptage des recettes et des dépenses lorsque l'on regroupe ces entités pour former l'univers statistique d'une province donnée. Il devient donc nécessaire d'isoler et d'éliminer ces opérations entre fonds ou à l'intérieur de l'univers.

Tableau 5 Classification économique des recettes générales brutes

Ce tableau classe les recettes générales brutes des séries de la gestion financière selon les sources économiques Les sources des recettes publics aux fins économiques sont les impôts directs des particuliers et des entreprises, les impôts indirects, les autres transferts courants des particuliers, les transferts d'autres niveaux d'administration publique, les revenus de placements et autres.

Impôts directs. Les impôts directs comprennent les impôts sur le revenu des particuliers et des corporations, l'impôt sur la feuille de paie, les droits successoraux et les droits imposés sur les bénéfices forestiers et miniers. Les cotisations des employés aux régimes de pension gérés par le gouvernement, les cotisations au Régimes des rentes du Québec et les versements à la Caisse d'indemnisation des accidents du travail sont également considérés comme des impôts directs.

Impôts indirects. Les impôts indirects comprennent les taxes de vente, les taxes sur les carburants, les taxes sur le revenu de primes des compagnies d'assurance, les taxes sur le capital et les taxes d'affaires, les taxes sur les spectacles ainsi que les impôts sur la propriété foncière et personnelle. Les privilèges, droits et permis achetés par les entités commerciales, tels que les permis pour véhicules automobiles, les permis portant sur l'exploitation des ressources naturelles, etc., sont également considérés comme des impôts indirects.

Other Current Transfers from Persons.

Transfers from persons consist of health insurance premiums, personal motor vehicle permits and licences, and other licences and permits such as fishing, hunting and marriage licences. Fines and penalties also fall into this economic category.

Transfers from Other Levels of Government.

This category includes both general and specific purpose transfers from federal and local governments. The provincial share of federal estate tax, the tax on undistributed income and income tax on privately owned public utilities are classified as transfer payments at the provincial government level.

Investment income. Interest, dividends and profits on foreign exchange, royalties and the remitted profits of government enterprises as well as liquor boards are included under this economic classification.

Other revenue. For example, sales of goods and services sales of land and fixed assets and other revenue items are not regarded as adding to production in the economic sense.

Table 6 Economic Classification of Gross General Expenditure

The objects of expenditure used in the economic classification are purchases of goods and services and transfer payments to persons, business and other levels of government.

Purchases of Goods and Services This classification includes all current expenditures of government on such salaries and wages, materials and supplies, travelling expenses, professional services, purchases of land, write-offs of bad debts and other final expenditures. For purposes of this publication, transfer payments to public hospitals are also treated as purchases of goods and services.

Transfers to Persons. Transfers to persons consist of payments to individuals and non-profit institutions for which no direct service is rendered by the recipients. Included in this latter group are universities, other post-secondary educational facilities and private non-commercial organizations and associations. For purposes of this publication, interest on the public debt is also treated as a transfer to persons.

Transfers to Business. This category includes both subsidies for current operations and capital assistance payments made to business. Subsidies for current operations represent payments designed to make it possible for producers to stabilize or lower

Autres transferts courants des particuliers. Les transferts des particuliers comprennent les primes personnels pour véhicules automobiles et les droits et autres permis tels que les permis de pêche, de chasse et de mariage. Les amendes et pénalités entrent également dans cette catégorie économique.

Transferts d'autres niveaux d'administration publique. Cette catégorie comprend les transferts à des fins générales et à des fins spécifiques du gouvernement fédéral et des administrations locales. La part provinciale de l'impôt fédéral sur les biens transmis par décès, l'impôt sur le revenu non distribué des sociétés et l'impôt sur le revenu des services privés d'utilité publique sont classés comme des transferts au niveau du gouvernement provincial.

Revenus de placements. Les intérêts, dividendes et le profit sur le change étranger, les redevances et les bénéfices déclarés des entreprises publiques ainsi que les régies des alcools figurent sous cette rubrique.

Autres recettes. Par exemple, les ventes de biens et de services les ventes de terrains et d'immobilisations ainsi que d'autres éléments de revenu dont on ne considère pas, au sens économique, qu'ils contribuent à la production.

Tableau 6 Classification économique des dépenses générales brutes

Les articles de dépenses utilisés dans la classification économique sont les achats de biens et de services et les paiements de transfert aux particuliers, aux entreprises et à d'autres niveaux d'administration publique.

Achats de biens et de services. Sous cette catégorie figurent toutes les dépenses ordinaires des gouvernements pour des postes tels que les traitements et salaires, les matières et les fournitures, les dépenses de voyage, les services professionnels les achats de terrain, l'amortissement des créances douteuses et autres dépenses finales. Dans la présente publication les transferts aux hôpitaux publics sont également considérés comme des achats de biens et services.

Transferts aux particuliers. Les transferts aux particuliers consistent en paiements aux particuliers et aux institutions sans but lucratif et en échange desquels les bénéficiaires ne rendent aucun service direct. Dans cette catégorie se trouvent les universités, les autres établissements d'enseignement post-secondaire ainsi que les organismes et associations privés non commerciaux. Dans la présente publication, l'intérêt sur la dette publique est également considéré comme un transfert à des particuliers.

Transferts aux entreprises. Sous cette rubrique entrent les subventions au titre des opérations ordinaires et les paiements sous forme de subventions pour fins d'immobilisation versés aux entreprises. Les subventions au titre des opérations ordinaires représentent des paiements destinés à

prices while capital assistance covers grants made to commercial enterprises to assist in the acquisition of new facilities or machinery and equipment. Home-owners' subsidies paid by provincial governments in Saskatchewan, Alberta and British Columbia are also included in transfers to business.

Transfers to Other Levels of Government.

Transfers to other levels of government consist of grants to local governments. The term "local government" refers to municipalities, local school boards and other municipally organized bodies such as conservation authorities.

Table 7 Historical Summary of Gross General Revenue and Expenditure

This table presents actual data for four years, estimated data for a year on gross general revenue by source and gross general expenditure by function for each province and territory. Data are also presented at the Canada total. Actual data are obtained from the present publication while estimated amounts are to be found in the publication entitled *Provincial Government Finance — Revenue and Expenditure* (Estimates) (Catalogue 68-205).

permettre aux producteurs de stabiliser ou d'abaisser leurs prix, cependant que les subventions pour fins d'immobilisation portent sur des transferts consentis aux entreprises commerciales pour les aider à acquérir de nouvelles installations ou des machines et du matériel. Les subventions aux propriétaires de maisons payées par les gouvernements de la Saskatchewan, de l'Alberta et de la Colombie-Britannique font également partie des transferts aux entreprises.

Transferts à d'autres niveaux d'administration publique. Les transferts à d'autres niveaux d'administration publique comprennent les allocations aux administrations publiques locales. Par "administration publique locale", on entend les municipalités, les conseils scolaires locaux et autres formations organisées en municipalités, comme par exemple les offices de conservation.

Tableau 7 Sommaire chronologique des recettes et des dépenses générales brutes

Ce tableau regroupe les données réelles pour quatre années et les données estimatives pour une année en ce qui concerne les recettes générales brutes par source et les dépenses générales brutes par fonction, par province et par territoire et pour l'ensemble du Canada. Les chiffres réels proviennent de la présente publication, tandis que les estimations sont extraites de la publication intitulée — *Les Finances des gouvernements provinciaux — Recettes et dépenses* (Prévisions) numéro 68-205 au catalogue.

TEXT TABLE I. Revenue Sources as Percentages of Gross General Revenue

| No. | Source | New- foundland Terre- Neuve | Prince Edward Island Île-du- Prince- Edouard | Nova Scotia Nouvelle- Ecosse | New Brunswick Nouveau- Brunswick | Québec | Ontario | Manitoba |
